An official despatch from Busca, had gradually approached her desk; and had gradually approached her desk, and while leaning with her elbow on it and her hand on her face, Norris came up on the other side. He, it seems, asked her to marry him and she replied "No." He then drew a revolver from his pocket and fired at her, the ball going between her fingers and into her face. She immediately dodged down under the desk, when he caught her by the arm with his left hand, dragged her out and fired two more shots, which struck her in the head. She then ran outside, screaming, and into the first dwelling, about one hundred yards away. Doctors Sproule, of Markdale, and Barnhart, of Owen Sound, are attending the young lady, and up to the present time have not extracted the ball, which entered her face. She lies in a very low condition, having lost a large quantity of blood. Norris, before moving from the place where he shot her, fired one shot at himself, the ball entering his right temple. He dropped to the floor insensible, never spoke and died in about an hour afterwards. Two or three children were in the room during the time of the tragely. Miss Ford is a highly respected young lady, under 20 years of age. Her people live about a mile out of the village, her father having a large grist mill. Norris came to this place from Lyons Head, County of Bruce, on the first of January of the present yeer, and began teaching. He gave universal satisfaction as head teacher in the Markdale public school, where three teachers are employed.

RESULTS OF THE FORESTRY EXHIBITION .-Gleghorn, in addressing the Scottish Arboricultural Society at their annual meeting on Tuesday, referred to the educational results that were likely to flow from the Forestry Exhibition, and expressed the hope that not the least of its fruits would be the establishment of a Forestry School in Edinburgh. He also stated that the Exhibition gave promise of being attended with so much success that the guarantee fund was

not likely to be encroached upon. THE "JOHN REID" PRIZE, -The "John Reid" Prize, founded by the sister of the late Dr. John Reid, Glasgow, for the best original research bearing on any of the departments of medical science, conducted in one of the hospitals and laboratories of the city, has just been awarded for two years to Mr. H. Some time ago a party of gipsies, who had been encamped in a district of the west coast of Ross-shire, took the liberty of grazing their horses on pasture belonging to a township of small tenants there. The tenants resented, and drove away the intruders. On tak ing their departure, some of the gipsies were heard to remark that the tonants should not be quite so conservative of their pasture, for, ere long thep would have no cattle to graze upon it. At the time no notice was taken of the implied threat. Soon after, however, three valuable cows belonging to one of the tenants died in quick succession, while two of the other tenants lost a cow each. The illness of which these animals died was of very short duration, and such of the carcases as were examined presented no morbid appearance. - A respectable farmer, who is considered an authority in veterinary matters, had been called to see one of the animals shortly before it died, and he at once pronounced it to have been "witched," as the symptoms were those of no known disease. On the strength of this statement, coupled with the ominous language made use of by the gipsies, a considerable section of the community, unhesitatingly attributed the douth of the cattle to the agency of witchcraft! As a charm against the evil influences at work, one of the tenants, acting on the advice of the initiated, had the door of his byre changed from one side of the house to the other. rending the result of this charm, a young man has give to one of the vestern isles to consult a without of consult as the in practice there. AN ENGLISH EXPLORER ON THE GREELY EXPEDITION.

London, Aug. 20.—Clement R. Markhain, who served in the Franklin search expedition in 1850-51, has written a letter in which he says the accusation of murder and cannibalism made against the Greely party is a disgrace to American journals. would have suggested silence until Greely had submitted his report to the government There may be a remnant of truth in the charge. It is possible, but unlikely, that brave men in the last extremity should have sucoumbed. Markham says the American navy department should have controlled been responsible for the expedi-The party should never have been left without a depot ship wintering within accessible distance. The difficulty of navigating the channels north of Smith's Sound was ignored and precautions were neglected, hence the catastrophe for which there is no excuse. Greely's observatory work will form a valuable supplement to the observations taken by the ship Discovery in 1875. The Greely expedition will bear the test of thorough scrutiny. Members of the expedition are mistaken, however, in stating that Beaumont's Cape Brittannia was visible from Lincoln Bay on the west side of Robeson Channel. MURDER IN VERMONT Montpelier, Vt., Aug. 23.—Clark Sanders, a farmer, aged 40, residing here, came to town this morning and purchased a revolver; he put three cartridges into it and proceeded to the store of Dan Carr. . The latter was at his desk doing business with two ladies, when Sanders drew the revolver and fired three times, one bullet taking effect in the neck and two in the body. Carr died in a few minutes. Sanders put the revolver in his pocket and walked out of the store. Workmen in an adjoining shop, who heard the shooting, captured him. The murderer said: "I shot him and hope he is dead, as I intended to kill him. Get your officer and do what you please with me." The cause of the shooting was The cause of the shooting was jealousy by Sanders of his wife. Carr was 60 years old, and did a provision and auction business. He leaves no family. Sanders has one son, two months old, whom he took away from home yesterday and placed with his brother. Sanders says be expects to hanged.

" PA, ME LEG'S CUT OFF." A RUSSEL COUNTY BOY SUSTAINS A DREAD

FUL ACCIDENT.

DUNCANVILLE, August 22.—On Saturday last a four-year old son of Mr. Harrington, who lives near this place, had his leg cut off a little below the knee by a reaping machine. The little fellow's father had been using the machine which was attached to a horse, and the boy was in the field with him. Mr. Har-ringtoo's attention being attracted to some-thing else in the field, he moved a short distance away from the reaper, leaving the child standing beside the horse with a whip in his hand. Mr. Harrington had forgotten to throw the machine out of gear when he left it. The lad, for want of better amusement gave the horse a cut of the whip, the animal naturally enough bolted and the sharp blade of the reaper came in contact with one of his legs and completely amputated it. The little chap, strange to say, did not fall, but coolly stooped down and nicking up the severed limb, cried out to his father, "Pa, me leg's cut off." It is needless to say that a few minutes afterwards the unfortunate little fel-

The Mail says:—We understand from

official sources that the famous "lumber account" of the Federal bank has been sold for the sum of \$800,000. As the debt was understood to be somewhere about \$1,300,000. this would be equivalent to about 61 to on the dollar, which seems to be considered by parties well qualified to judge as a very good bargain for the bank. To the amount received, however, must be added the advantage gained from an early settlement of what would otherwise have been a tedious one, and the fact that the receipt of this large amount of money will almost certainly leave the Federal able to work on its way without any external assistance.

COMMERCIAL. WEEKLY REVIEW-WHOLESALE MARKETS.

The improvement expected with the anproach of the fall trade is rather slow in putting in an apearance," but there is no lack of confidence in the situation. The banks hold large revenues which can be made available for advancement on crop purchases, and later on operations will be enlarged. The fine weather has given every advantage to the farmers of the Province to house the crop in good condition, but those who are backward appear likely to suffer from the present aspect of things, as the probabilities are not favorable for continued fair weather. Importations are said to be moderate and within proper limits, and if this is so a great cause of unessiness is removed, as from the number in pusiness competition is already keen enough without the temptation to get rid of surplus stock at a still greater sacrifice of

DRY Goods-The railway companies have this year withdrawn the privileges heretofore accorded to the Dry Goods Association of issuing return tickets at the price of a single fare. In the place of this the following arrangement has been substituted :- The Grand Trunk Railway will issue return tickets to Montreal in September, which will be good for ten days from date via regular train to Toronto and special from Toronto, Tickets will not be accepted by No. 1 G.T.R. main line, nor the limited St. Louis express trains 5 50 lor lobsters, \$4 for mackerel per case of cast and west on the G.W.R. division. BONSECOURS MARKET TO-DAY.

Tomatoes were as low as 30c to 50c a basket, and cabbages sold at \$1.25 to \$3 the hundred. Cucumbers were dirt cheap, being sold at 40c a barrel.

MONTREAL HORSE MARKET.

MONTREAL CATTLE MARKET. The receipts of live stock since Thursday

were 45 cars of export and 36 cars local stock. This shows a considerable falling off in the way of receipts, which is accounted for by the quiet demand. There is a fair movement in shipping cattle, but prices still continue low at 51 to 51c per lb. live weight as to quality. Shipping sheep met with a fairly good request, sufficient to effect a fair clearance of the receipts at figures ranging from 33 to 4c per lb live weight as to quality, the top figures for choice. In butchers' stock very little movement was noticed and the bulk of the receipts were transferred to Viger market, where they constituted the pickof the supply.
