The Ymir gold mines profit for the month of August was £5,480, about the same as that for the previous month. A cyanide plant is being installed, which is expected to enhance the profits very considerably.

The "Charmer" took to Victoria last week the machinery, wire cables and ore buckets for a wire tramway to be erected at Alberni on the Hayes property. This is the first to be installed at an island mine, says the Province.

The American Consul-General, at Montreal, has sent to his Government a report on the corundum deposits of this country, of which he speaks very highly. The corundum now being produced in Combermere is 95 per cent. pure, whereas manufacturers have heretofore been satisfied with an 80 per cent. article.

Prof. Miller has returned from a trip to the country north and west of Lake Temiscamingue, and reports much good farming land there, and surface indications of valuable iron and copper deposits on the ridge of broken country along the height of land. He has now gone to examine the reported iron discoveries in Lount and Hutton townships, in the District of Parry Sound

The River Herbert coal mine has been taken over by a new company, to be known as the Minudie Coal Co., Limited, Amherst, with a capital of \$150,000. The following directors have been elected: J. A. Dickey, Amherst, president; J. D. McGregor and J. H. Sinclair, New Glasgow; M. D. Pride, Job H. Seaman, Barronsfield; John Harrison, Maccan, and Max M. Stearne, Amherst.

When the Klondyke was first discovered, winter mining by thawing out the ground was the principal method of working, and the dumps were washed out in the spring. Lately, and especially during the last year, Dawson has become what is known as a summer camp. This means that most of the work has been done in the summer, and washing has been going on at the same time as the actual removing of the dirt. Now, however, it looks probable, according to statements made by returning miners to the British Columbia press, that the old method of winter mining will be resumed to a large extent.

Thus far this season, the Rat Portage Lumber Co. has started 50,000,000 feet of logs down Rainy River. Last week there were 13,000,000 yet to go out of Rainy River into the river, and 12,000,000 feet to come out of Little Fork river. That makes 76,000,000 feet for the season, which, all told, is more than the cut of last winter.

THE Grand Trunk continues to improve its line between Port Union and Whitby. These improvements include double tracking and levelling the grades. When completed, the Grand Trunk will have a fine double track between Toronto and Montreal, with the exception of the part of the line between Whitby and Port Hope, a distance of less than thirty miles.
