

IT TAKES TIME

to get into a safe. Burglars can't take chances on interruption.

And interruption is certain if you have Central Station Signal Service. They cannot enter the vault or touch your safe without sending in an alarm which brings a special officer to the scene, post-haste.

If you employ a night watchman too, it forces him to report every hour from every part of the building and gives him a ready means to call assistance in any emergency.

No matter what is wrong we know it quickly—and take the proper measures in time to save heavy loss.

It will pay you to learn more about this service by asking our nearest Office for Bulletin C

Electric Protective Signal Systems 2A
Toronto Montreal Ottawa Hamilton Winnipeg

TOXEMENT

SUCCESSFULLY

WATERPROOFS

ALL CLASSES OF CEMENT AND

CONCRETE CONSTRUCTION

Also used extensively in stucco surfaces and specially adapts itself for use in moulded work, not only waterproofing, but lubricating the mass, and so producing a body of greater density.

Write for 1915 Booklet.
