The work of borough councils, tho ss advertised than that of county puncils, is quite as useful and necesmen will offer themselves for election to these bodies. In England, the present centre of the feministe movement, a very wide and useful field for public activity is afforded to women already.

The supply of food for necessitous school children (if necessary) and the housing of the working classes, are also subjects in which a woman's advice and help cannot but be welcome. It is reported that in a provincial town where some workmen's dwellings had just been erected, it remained for a woman to point out that there were no cupbdards, and that all the pantries opened into the kitchens and had no windows to the outer air!

Hoffman told the police that he often met the girl and was jealous of her because of the attentions of another man. Hoffman was arrested. Miss Zeigel refused to identify him as the man who shot her.
