## EDUCATION BOARD'S INAUGURAL INSPECTORSHIPS CAUSED DEBATE

Geo. Gooderham Wins Chairmanship-Formation and **Duties of Committees.** 

The initial meeting of the newly ap ointed Board of Education was held last night. Trustee Byron E. Walker route to Europe. William Dincen and Frank A. Anglin, separate school representatives, were present. Trustee W. H. Shaw was elected chalrman pro. tem, and Trustee Harry Simpson secretary pro. tem.

It was moved by Trustee Parkinso seconded by Trustee Geo. Gooderham. that the election of chairman be by open voting, and that it requires a majority of those present to elect. The notion was agreed to unanimously. Trustees Gooderham, Ogden and Brown were then nominated for the position of chairman and a vote taken with

MR. D. D. Sutherland, general secretary of the choist Missions, is now well on the road to recovery from his late illness, due to a severe shaking up which he received in Montreal a couple of weeks ago, when he was run down by a sleigh.

THE THIRD ANNUAL REPORT OF THE

## CENTRAL LIFE **INSURANCE COMPANY**

FOR THE YEAR 1903.

At the annual meeting of the Central Life Insurance Company, held on January 26th, the following report was adopted:

Your Directors have pleasure in submitting for your approval the Report

Little Liver Pills.

Your Directors have pleasure in submitting for your approval the Report and Statement of Accounts for the year 1903.

The number of new applications for Insurance and revival of policies received during the year was 372 for \$386,500,00. Of these, 18 applications for \$20,750.00 were declined or deferred, and still pending at the end of the year. The policies issued and revived were 354 for \$365,750.00.

The total Insurance in force at the end of the year was \$487,750.00, a gain over the previous year of \$128,000.00.

The income from Insurance premiums was \$14,369.61, and interest, etc., \$9.086.80, making a total of \$23.456.41.

\$9,086.80, making a total of \$23,456.41.

The total Assets, after paying expenses of Management, Death Losses and Re.insurance amounts to \$54.036.21, the items of which are set forth in the Balance Sheet. Our policies are all valued upon the Institute of Actuaries' healthy male tables of mortality and 3 1-2 per cent. interest.

The Dominion Government, on the 1st of January, 1900, deemed it advis-

able and for the safety of policyholders to adopt by Act of Parliament the above standard of valuation for new business for all Life Companies. The Act further provides that the old Insurance, namely, those existing prior to the 1st of January, 1900, may still continue to be valued upon a 4 1-2 per cent, basis until 1910, after which time a 4 per cent. interest rate must be employed, until 1915, when it will become compulsory to value all Insurance on a 3 1-2 per cent. basis, as already adopted by our Company.

The Central Life having adopted the ultimate Government Standard basis our average reserves on a 3 1-2 per cent, basis are higher than those on the 4 per cent, basis by from 5 to 7 per cent, and from 10 to 14 per cent, higher than those on the 4 1-2 per cent, basis, which means that the funds of this Company will not need to be disturbed by making a change in the basis of valuation, as will be required by the Government of those Companies which have not yet adopted the higher values, and your Directors feel that their action in thus protecting the policyholders in the higher standard of security of contract will prove of great satisfaction to all those interested in the welfare of the Central Life Insurance Company.

The Company's Auditors have made a careful and continuous audit throughout the year of the Company's books, vouchers, etc., and the securities for investments, the cash and Bank balances have been verified. Their report being appended hereto. The Directors and officers take this opportunity of thanking the Superintendent, Inspector and Agents for their valuable assistance during the year.

THOMAS CRAWFORD,

President. J. M. SPENCE. Managing Director.

AUDITORS' REPORT

We beg to report that we have audited the books of the Company for year ending 31st December, 1903, and have examined the touchers connected therewith, and certify that the financial statements agree with the books and

The securities represented in the Assets have been verified with the books of the Company, and are correct, and correspond with the schedules The Bank balances and cash are certified as correc

Q. D. DAY and R. F. SPENCE, F.C.A.,

Toronto, January 19th, 1904.

in conclusion, gentlemen, it gives me much pleasure in moving the adoption of this report to be able to say that after giving the most careful consideration to the business of the Company in all its phases, the outlook presents nothing but encouragement.

Medical Referee Dr. Groyes, in seconding the adoption of the Report,

In seconding the adoption of the Report, I may be permitted to say that a careful examination of the statement before you gives satisfactory evidence of substantial progress. The amount of Insurance carried by the Co at the close of the year shows a gain over the previous year of 35.58 pe at the close of the year shows a gain over the previous year of 35.58 per cent. This is very creditable. Our income for premiums shows a gain over the previous year of 21.08 per cent. This, together with our income from other resources, we have been told by our President will be sufficient to meet our duture obligations, and is very gratifying for the time our Company has been doing business.

Allow me to mention another department, which I believe is of much interest to shareholders and policyholders, and will undoubtedly have an

Allow me to mention another department, which I believe is of much interest to shareholders and policyholders, and will undoubtedly have an important bearing upon the earnings of the Company and the nature of its securities in future. I refer to our Investment Department, which, in my opinion, and I think in the opinion of all the Directors, is the most important branch of our business. A Life Insurance Company should be built upon such solid and secure basis that it will endure forever, and those entrusted with its affairs ought to act simply in the capacity of Trustees, whose duty it is to see that all investments are made with absolute security, and such has been the object kept in view by your Directors, No loan or investment is ever made without the unanimous approval of the members of the Board. TRY also DAVIES' Since our inception it has been a great pleasure for me to note that if the least objection is taken to any investment by any member of the Board, it is at once thrown out. I know that the aim of the Directors is to look for secur-

ity above all other conditions, and rate of interest, though important, is sec I have no hesitation in saying that our investments are absolutely good Wishing the Company another year of continued prosperity, I have much pleasure in seconding the adoption of the Report.

The motion was put and carried unanimou Moved by J. W. St. John, seconded by J. W. Bundy That the thanks of the shareholders are due and cordially tendered to

the Officers and Agents of the Company. Carried. The Manager, Mr. Spence, in replying on behalf of the Officers and

those associated with me in the office, and in the field, your vote of thanks. I can truly say we owe much of our progress and success to the efforts of our energetic agents throughout the province, and while we are glad to acknowledge their services, we extend to them our best wishes for their success during the present year.

I would like to remind our shareholders that no person should be guided in their preference of a company on account of its size or age, as in no case has a policyholder any interest whatever in the reserves or profits of a com-pany which have been accumulated prior to the time of their entry. It is possible, however, in many instances that the future profits of policyholders nay be called upon to make good the increased reserves the Government of Canada now require on the policies of older members. The Central Life is a young company, with no deficits to provide for, our rates are sufficient to provide for the reserves as required by the Dominion Government based on the Institute of Actuaries' healthy male tables of mortality and 3 1-2 per cent. interest and leave a comfortable margin for profit to our policyholders for their investments, and we confidently look forward to being able to give them every satisfaction in this direction. We believe our policies are as liberal as those issued by any company. If not more so, and in presenting them to the public we offer the advantage of the low rate of mortality prevailing Canada, the more moderate expenses of management and the satisfaction of knowing that the total assets of a Canadian Company remain in your own country, and are available at all times for the security of every policyholder Moved by J W. Bundy, seconded by J. W St. John, that Q. D. Day and F
