Our continuous properties are only beginning to realize the saving in time and distance that this new station is effecting, the still greater saving to come. First get this idea, that from Leaside Junction by North Toronto over to West Toronto Junction the distance (the string of the bow) is 5.9 miles, while between the same two points via Union Station (the bow of the string) is 9.8 miles, or 4 miles longer than the string.

Also the string has hardly any grade; a drop of only 32 feet from Leaside to West Toronto. But Leaside is 183 feet alove lake level, Union Station 8 feet, West Toronto 150 feet, or a drop down to Union Station from Leaside of 173 feet and a corresponding climb going east; a climb of 140 feet to West Toronto and a corresponding drop coming in. It's this climb both ways from Union Station that costs the time and the coal! Four miles of distance, 15 minutes of time! Leaside to Union Station... 5.3 20 Union Station to W. Toronto 4.5 20

Leaside to North Toronto.... 2.3 North Toronto to W. Toronto 3.6 Saving by North Toronto. 4.0 15
But the saving in time and distance
will be realized by many more people
when a lot of the thru trains go by

North Toronto and make the saving is the 8 a.m. from Montreal, connecting with the Teeswater, Goderich and Camp Borden trains out. But North Toronto station is built to handle in a first-class way great thru expresses, and some of these will soon be timed that way. The travelers will demand it.

But greater even than time and distance is the quickness, light, cleanliness, safety, of North Toronto over Union Station.
