

Doctry. From the Boston Patriot.

THE DEAD.

Pence to the silent dead! Pence to your voiceless sleep—pale race of men, Cutured from sea and land, from hill and glen To fill the same cold bed!

SCIENTIFIC PURSUES.

SCIENTIFIC PURSUES.—Science does not in this country reward her votaries as the various professions do their members. There are no offices of honour, or emolument, to which scientific attainments are the passport.

ROYAL SOCIETY.

ROYAL SOCIETY.—The distinction of becoming a Fellow may be purchased for £30, by any one tolerably recommended, and it costs the most eminent philosopher precisely the same sum—a sum which to the greater number of men of science, is no trifle.

THE RUSSIAN EMPIRE.

THE RUSSIAN EMPIRE.—A more accurate and satisfactory knowledge of the form and extent of this immense empire cannot, we believe, be so readily and distinctly gained as by an attentive inspection of the beautiful map of that country, which appears in the second part, just published, of "The Family Cabinet Atlas," with other maps, of France, Europe, and Scotland.

Tom Growler.

TOM GROWLER.—The great bell of St. Paul's cathedral is known under this elegant cognomen. The hours are struck upon it, and when struck, like other growlers, it gives a loud and sudden noise and remains quiescent; but when tolled or rung out in the usual manner, its sound has been known to cause such a percussion of the air as to break all the windows in the neighbourhood, and rock the mighty dome in which it hangs.

Who shall decide when Doctors disagree?

"Who shall decide when Doctors disagree?"—Pitcairn calculated the force at which the heart contracts in order to ensure the due circulation of the blood to be equal to 117,088 lbs, at each contraction; and Berelli, at 180,000 lbs; whereas Monro calculates it at not more than five ounces!

At the commencement of 1801, Fulton presented to Bonaparte his memorial on steamboats.

At the commencement of 1801, Fulton presented to Bonaparte his memorial on steamboats. I urged a serious examination of the subject. "Bah," said he, "these projectors are all either intriguers or visionaries. Don't trouble me about the business."—Bourrienne.
