WIRELESS ACROSS BEHRING SEA

Washington, Feb. 20.—Arrangements are being made for the establishment of regular wireless service across Behring Sea between the American and Russian governments, which will insure telegraphic communication between America and Asia at all times.

No new construction is required for the institution of this service. The Russian government already has a wireless tower at Anadir, in Kamchatka, and the American government a similar station at Cape Nome, Alaska. There has been some limited exchange of signals across Behring Sea between these towers, but owing to the operators' limitations in the way of language, they have been unable to communicate intelligibly, a difficulty, which, of course, can easily be overcome by the employment of operators who can speak Russian and English.

Probably the new service will be conducted under the same regulations as have been applied to the general commercial service of the government wireless system.

Little Beauty Chats By BLANCHE REASON

A Bitter Enemy To Beauty. INTER seems to be the time for styes, although why this is I know not, unless it be that over-heated rooms, an unventilated room, and little exercise store up humors in the blood which work their way out through the skin and ally themselves to a horrid world disease as styes.

to the eruption, it will, at times, succeed in scattering the stye. Gum camphor will do much the same thing and is easier to use, or so I think, as it is extremely difficult to keep ice from slipping out of one's grasp.

The only Baking Powder made from Royal Grape Cream of Tartar

St. John, N. B., to Boston, with a cargo of about 175,000 feet of lumber. She left Rockland on Tuesday, and in the afternoon ran into the severe northerly gale. Toward midnight, when between Boase Island and Thatcher's Island, the vessel labored heavily and sprung a leak. Although all hands were kept constantly at the pumps the vessel took in nine feet in the hold, and became unmanageable. The crew suffered severely from the cold, the water making a clean breach over the cabin, drenching them to the skin. The vessel will be repaired temporarily and at a favorable opportunity will be sent to Boston.

Turn luck into certainty on baking day

Don't envy the housewife whose "good luck" in baking never seems to fail her.

We'll tell you one of her most precious secrets: Her flour moistens evenly, ferments evenly and bakes evenly.

Rainbow Flour does all these things, because all of the particles are of even size and hardness. That's what enables it to give such uniformity of results.

One other thing: Rainbow Flour is made of the best hard wheat in the world—famed for its keeping qualities. And only the most nourishing parts of this wheat are allowed to enter into the making of this truly unusual flour.

Try some. It will turn your luck into certainty, too.
