CHIMSTOPHER DELICE,
Callector of Rate Collector of Rates, Scrofula, or King's Evil,

Scrotula, or King's Evil, is a constitutional disease, a corruption of the blood, by which this fluid becomes vitiated, weak, and poor. Being in the circulation, it persads the whole body, and may burst out in disease on any part of it. No organ is free from its attacks, nor is there one which it may not destroy. The scrotiators tain is variously caused by melecurial disease, low, living, discordered or undeathy food, impure air, filth and fiithy habits, the degressing vices, and, above adi, by the venereal infection. Whatever be its origin, it is herealitary in the constitution, descending "from parents to children unto the third and fourth generation;" indeed, it seems to be the rod of Him who says, "I will visit the iniquities of the fathers upon their children."

Its effects commence by deposition from the blood of courrupt or ulcerous matter, which, in the lungs, liver, and internal organs, is termed tubercles; in the glands, swellings; and on the surface, craptions or sores. This foul corruption, which genders in the blood depresses the energies of life, so that scrofulous constitutions not only suffer from scrofulous consplaints, but they have far less power to withstand the attacks of other diseases; consequently, vast numbers perish by disorders which, although not scrofulous in their nature, are still rendered fatal by this taint in the system whost of the consumption which decimates the human family has its origin directly in this scrofulous contentination; and many detri-citve diseases of the liver, kinders, brain, and, indeed, of all the organs, arise from, or are aggravated by the same cause.

One quarter of all our people are scrofulous; their persons are invaded by this lunking infection, and their health is underline, and invigorate it by healthy food and exercise. Such a medicine we supply in

AYER'S

Compound Extract of Sarsaparilla, the most effectual remedy which the medical skill of our times can devise for this every where prevailing and fatal malady. It is com-bined from the most active remedials that have where prevailed and tath mindly. It's com-bined from the most active remedials that have been discovered for the expurgation of this foul disorder from the blood, and the rescue of the system from its destructive consequences. Hence it should be employed for the cure of not only scrofula, but also these other affec-tions which arise from it, such as Euretiva and Shin Diseases, St. Anthony's Fire, Rose, or Envirences, Primers, Perfues, Blotenes, Blains and Boils, Temors, Tetters and Shif Rheen, Sald Head, Ringworm, Ringematish, Syphilitic and Mrecurnal Dis-eases, Dropsy, Dyspersia, Dishirit, and, indeed, all Complaints and Shir Fion Vita-ted on Inferent Blood. The popular belief in 'emparing of the blood.' is founded in truth, for scrofula is a degeneration of the blood. The particular purpose and virtue of this Sarsopa-rilla is to purify and regenerate this with fluid, without which sound health is impossible in contaminated constitutions.

Ayer's Cathartic Pills,

FOR ALL THE PURPOSES OF A FAMILY PHYSIC,

FOR ALL THE PURPOSES OF A FAMILY PHYSIC, are so composed that disease within the range of their action can rarely withstand or evade them. Their penetrating properties search, and cleaned, and insignrate every portion of the human organism, correcting its decaded action, and restoring its healthy vitalities. As a consequence of these properties, the invalid who is bowed down with pain or physical delaitiy is astonished to find his health or energy restored by a remedy at once so simple and inviting.

Not only to they care the every-day complaints of every body, but also many formidable and dangerous diseases. The agent below manual is pleased to furnish gratic my American Almantac, containing cerdificates of their cures and directions for their use in the following complaints: Conferences, Hearthern, Penduche arising from disordered Romach, Aunten, invigaction, I am a and Morbid Inaction of the Boucch, Pleatiency, Loss of Appetite, Januace, and other kindred complaints, arising from a low state of the body or obstruction of its functions.

Patients in advanced stages of the disease.

So wide is the field of its usefulness and so numerous are the cases of its cures, that almost every section of country alrends in persons publicly known, who have been restored from alarming and even desperate diseases of the lungs by its asse. When once tired, its superiority over every other medicine of its kind is too apparent to escape observation, and where its virtues her known, the public no longer lessitate what antidote to employ for the distressing and dangerous affections of the pulmonary organs that are incident to our clamate. While many inferior remedies threat upon the community have failed and been discarded, this has gained friends by every trial, conferred benefits on the afflicted they can never forget, and produced cures too numerous and too remarkable to be forgotten.
