REPORT OF SURGEON.

T. F. CHAMBERLAIN, Esq.,
Inspector Public Charities.

MY DEAR SIR,—I beg to again present the annual report of the physician to the Ontario Institute for the Blind for the year ending September 30th, 1899. The general health for the year has been good. Principal Dymond was confined to the house for some weeks in the early part of the year with a severe attack of influenza complicated with a sharp broncho-pneumonia. By the aid of a wonderful physique and by the able assistance of J. W. Digby, Esq., M.D., we were enabled to baffle the disease and in the early spring he was restored to perfect health.

In October and November there was an outbreak of diphtheria of a mild type. In all there were six cases and all made good recoveries. Antitoxin was used in treatment and also as an immunizing agent with remarkable effect.

In March of 1899 an old and faithful employee, Henry Kerr, was obliged to stop work and died in May of acute tuberculosis.

With these few exceptions the health of the officers, pupils and employees has been exceptional, the pupils particularly thriving because of the regular life and careful management of the Institution.

I have the honor to be, Sir,

Your obedient servant,

JOHN A. MARQUIS,

Acting Physician.

Brantford, October 8th, 1899.
