FRENCH STUDIOS HURT BY AMERICAN FILMS

Competition From U. S. and Germany

PARIS, Feb. 3.—The French cinema ndustry is dangerously near collapse, says M. Delac, one of the leaders in the film world here. In appealing to the Paris municipal council not to compel the closing of theatres by the proposed increase of city taxes, he points out that American as well as German competition spells death to the film studios of France, and will force

600,000 persons out of work.
"Cinema photography is a French art which has been industrialized by Americans and Germans," M. Delac said. "At present we are actually sub-merged with thousands of American films, while a large number of German films bearing American marks are find-ing their way over the market." M. Delac insists that the French Gov-ernment must take a hand if it wishes to get the advantage of propaganda which the United States is obtaining from films sent abroad. He declares he was shown a letter by an American film representative bearing President Wilson's signature, and assuring the fullest co-operation because of the ex-

NEW ANAESTHETIC BETTER THAN GOCAINE. THOUGH ITS NAME IS 47 LETTERS LONG

CHARLOTTEVILLE, Feb. 3.—It has remained for surgeons to deaden pain with 47 letters of the alphabet. These letters form the word "para-amino-benzoyldie-thyla mino-ethanol-hydrochlorid." This is a new anaesthetic, better kno wn as pro-cain, or novo-cain, which possesses all the pain deadening, but none of the habit-forming qual-

It was discovered in Germany early in the present century, but did not come into common usage until early in the war. Physicians of the University of Virginia Hospital were among the first to introduce the drug into this country, and for the past few years it has been used extensively in this institution for operations upon the eye, ear, nose and throat, and for major operations.
Some of its unusual properties were described today by Dr. J.

N. Waddell.

"The fact that novo-cain is teen times less poisonous, or toxic, than cocaine, makes it more desirable as a local anaesthetic," he said. "It is a synthetic benezine derivative, non-irritating in character, and quantities as high as seven and one helf grains may be administered without harmful effects. It superinduces no exhibitation, after being absorbed by the blood, Its after-effects are practically nil. In operations where large areas have to be injected with a local anaesthetic to block off pain impressions from the brain, doctors are always fearful of using a great quantity of cocain e on account of its harmful effects upon the heart and respiration."

SPLITTING OF LIGHT RAYS REVEALS STAR'S DIAMETER

PASADENA, Feb. 3.—Dr. George Ellowy With Itching, with Itching, another day with Itching article describing the successful measuring at the observatory, December 13, operation reconsidered with that of the sun, which is less than a million miles in diameter. The sun, if it were a hollow sphere, would contain a million bediened. Soc. abox: be 300,000,000 miles. be 300,000,000 miles.

"The stars are so remote that hitherto it has not been possible to measure
their diameters, in spite of the fact
that many stars must be much larger
that many stars must be much larger
than the sun," Dr. Hale writes: "In
his presidential address last August before the British Association for the Advancement of Science Professor A. S.
Eddington of Camborge, remarked:
"Probably the greatest need of stellar
astronomy at the present day, in order

astronomy at the present day, in order astronomy at the present day, in order

The best thing for steady use is just ordinary mulsified cocoanut oil (which is pure and greaseless), and is better than anything else you can use.

"He then went on to predict that the 'star with the greatest apparent diameter of almost certainly Betelgeuze, diameter 0.051 seconds of an arc."

"The result just obtained is a remarkable verification of this readiction." The measurement was made with the 100-inch Hooker telescope by Messrs.

Peaze and Anderson of the observatory staff. "No telescope is perful enough to silky, bright, lustrous, fluffy and easy to sor Michelson, director of the Ryerson Physical Laboratory of the University of Chicago, and an associate of Mount The result of their forty years' experience will supply every member any pharmacy, it's very cheap, as i a constant of their forty years' experience will supply every member any pharmacy.

The article explains how a device based on the phenomenon of interference of light, called an "interfero-meter," was attached to the 100-inch telescope at Mt. Wilson and tested. Correct Within 10 P. C.

"After further improvements," the rticle continues, "the Michelson device was applied to the measurement of Betelgeuze. The measured angular diame telgeuze. The measured angular diameter is 0.046 seconds of an arc, in surprisingly close agreement with Professor Eddington's calculation. While this is a preliminary value which will be improved by subsequent measures, it is probably correct within 10 per cent.

"To learn the linear diameter of the ster we must know its distance from star we must know its distance from

300,000,000 miles.
"The stars are so remote that hitherthe earth were fixed at its centre, the

than Betelgeuze may exist.
"The naw result beautifully confirms the recent conclusions of Russell, Hertzspring and other students of stellar evolutions. A few mears ago, Russell showed that there must be two great classes of stars; the 'glants,' huge gaseous bodies in an early stage of development, and the 'dwarfs,' which have condensed to the stage represented by condensed to the stage represented by

our sun. "The successful measurement of the actual diameter of a stellar 'glant' now furnishes the last link in the chain and prepares the way for a promising ex-

NEW SENATE CHAMBER WILL BE SCENE OF **OPENING CEREMONY**

Much Work Done On Parliament Buildings Since Last Session.

OTTAWA, Feb. 4.—(By Canadian Press, Ottawa Bureau).—Parliament opens on Monday (February 14) with the pomp and circumstance of pre-wardays. Last year, owing to the condition of the Senate Chamber, the House of Commons was utilized for the open-lar expensely. This session the speech ing ceremony. This session, the speech from the throne will be read in the Senate Chamber itself, members of the House standing meanwhile at the bar. Since prorogation much work has been done in the new Parliament Buildings. With the exception of furnishings, the Commons Chamber has been completed. The temporary ceiling has given place to decorations of gold leaf and blue. The Hall of Fame is in a considerably un-finished condition, with the exception of the end near the library entrance; and in the Senate, a good deal of elaborate carving and other decorative work remains to be done. Yet with all the drawbacks of an unfinished building, the ceremony promises to lack nothing in display. The first of the Meighen administra-

the table and Right Hon. Arthur dates in Yale, & C., East Elgin and lected evidence. The committee has Meighen will occupy the prime minister's West Peterboro.

the House. Hon. Martin Burrell has left the parliamentary arena, and his seat will probably be occupied by Hon. Rupert Wigmore. Right Hon. A. L. Sifton has succumbed to the illness from which he suffered so long. Since last session, also, Lieut. Col. McLeod, who sat on the Government side, and Joseph Gladu, who supported the Canadian water imperial trade and of supported the Canadian water imperial trade and of supported the Canadian water in the business to be submitted during the session. The Government will eventually make its proposals known to the House in the budget speech. With the whole tariff thus thrown into securing of adequate revenues; development of litter-imperial trade and of supported the canadian water imperial trade and of supported the capital speech. the suffered so long. Since last session, also, Lieut.-Col. McLeod, who sat on the Government side, and Joseph Gladu, who supported the Opposition have passed on to the majority. There will, too, by Sir Henry Drayton, minister of the successful candi-finance, has toured the country and col.—Thirteenth Parliament of Canada.

Montreal, Feb. 3.—Ferdinand Quevillon, aged 20, was driving a two-horse rig yesterday over the St. Lawrence River, between La Tortue and Verdun, when the ice over a recent cut broke, submerging the vehicle and drowning the man and the horses. His body has not been recovered.

A driver will make an effort to recover the body today.
