PLOW MAN "30"

ALL-STANDARD FARM TRACTORS.

AT SAME LIST PRICES AS SOLD IN THE U.S.

**2-3 Plow
13-30
Model**

COMBINES THE BEST FEATURES OF
Tractor, Automobile and Truck Engineering

OPERATES ON **KEROSENE OR GASOLINE**

**3-4 Plow
15-30
Model**

33¹/₃% Reserve Power Saves Time and Money

To get satisfactory results you must have a tractor with plenty of excess power.

Plow Man Tractors set a high mark, having 33 1-3% reserve in excess of rating. That's why they do better work and last longer. They make good under difficult field conditions and can handle heavy belt work with ease.

You can cover more acres, get more from each man's work—save time and reduce costs.

Lowest in Upkeep

Back of the Plow Man is a great record for low operating and fuel expense in both America and Europe. Farmers say the Plow Man operates smoothly with but few repairs or delays. Thus the value of our all-standard construction is proved from the standpoint of practical every-day service.

Dealers---Act Now

We have an excellent proposition in Plow Man Tractors for good, responsible dealers. Many automobile and garage men will be looking for other lines, owing to the impossibility of automobile manufacturers filling all orders. If you are such a man and want quick action—write or wire today for full particulars.

Built for Hard Work

Read the partial list of all-standard features at the right and you will realize why the Plow Man is equal to the hardest kind of farm work.

No machine faces more severe duty and more constant strain than the farm tractor. The Plow Man is built in every detail to meet these conditions.

Unit Power Plant

By using a carefully designed clutch bell housing we secure an absolute unit power plant combining our motor, clutch and transmission. This conserves power, cuts out a lot of lost motion and protects the important operating mechanism from all dust and dirt.

All-Standard Features

Plow Man "Buda" 4-Cylinder Motor for heavy duty service.
Foots Transmission delivers the power without waste.
Hyatt Roller Bearings reduce friction and save power.
Perflex Radiator—quick constant cooling.
Bennett Producer Carburetor makes success of kerosene as fuel.
High Tension Magneto, Impulse Starter, starts on quarter turn.
Pivoted Front Axle provides flexibility for rough land.
Automobile Type Control, easy to handle.
Trouble proof French and Hecht Wheels.
Light Weight—approximately 4500 lbs.

Square Deal for Canadian Farmers

SAME LIST PRICE AS USED IN UNITED STATES

Now that the Government has removed the Duty from this class of Tractor, no farmer in Canada should be called upon to pay from \$100 to \$400 more per machine than in the United States. Plow Man Tractors are sold at the same price to you as to the American farmer—Y.e.b. factory—no extra profit to Canadian Distributors. Immediate deliveries can be guaranteed in Manitoba and Saskatchewan. Machines stocked in Winnipeg. Write or wire at once for all particulars.
