9	To Governor-General the Marquis of Lans- downe.	March 30, 1886	Recording the correspondence and nego- tiations which have taken place with the delegates and the High Commis- sioner, and observing that as it appears doubtful whether satisfactory com- munication by steamship can be regu- larly maintained all the year round, it is important that the proposal to con- struct a "metallic subway" should receive the careful consideration of the Dominion Government, and the Secretary of State hopes the matter will admit of such a settlement.	46
