

CONTENTS.

INTRODUCTORY: THE CHEMICAL BASIS OF THE CELL.

CHAPTER I.

Page

The Scope of Physiology—The Physico-chemical Basis of Life— The Chemical Basis of Animal Tissues—Water—Proteins— Lipoids—Carbohydrates	17
--	----

CHAPTER II.

THE INFLUENCE OF PHYSICO-CHEMICAL LAWS ON PHYSIOLOGICAL PROCESSES. ENZYMES.

Properties of Crystalloids—Osmotic Phenomena in Cells—Reac- tion of Body Fluids—Colloids—General Nature of Enzymes or Ferments	26
--	----

CHAPTER III.

DIGESTION: NECESSITY AND GENERAL NATURE.

Digestion in the Mouth—The Salivary Glands—The Nerve Supply of the Salivary Glands—The Reflex Nerve Control of the Sal- ivary Secretion—The Normal Stimulus for Salivary Secretion (Direct and Psychological)—General Functions of Saliva.....	37
---	----

CHAPTER IV.

DIGESTION: THE CHEMISTRY OF SALIVA AND THE RELATIONSHIP OF SALIVA TO DENTAL CARIES.

Organic and Inorganic Constituents—The Reaction of Saliva—The Method of Measurement of Neutralizing Power of Saliva— The Deposition of Tartar and Calculi	46
---	----

CHAPTER V.

DIGESTION.

Mastication—Deglutition or Swallowing—Vomiting.....	53
---	----
