We challenge competitors to put their fanning mills in our barn for a trial test with the

KLINE FANNING MILL

We welcome such a test, because in no other way is it possible to so decisively demonstrate the superiority of the KLINE on all kinds of grain. It is absolutely unequalled for separating wild oats, chaff, all small seeds and smut. In grading seed grain this mill will pay for itself three times over in one year off 40 acres, giving heavier yield per acre than any mill built. Write for full particulars, price and terms. Agents wanted in unrepresented territory.

Suggested Farm Names.

Suggest suitable names for a farm on which a number of maple and elm trees are growing in the front. N. B.

Ans.—As far as possible the name chosen for the farm should be suggestive of something on the place. We might suggest "The Maples," or "The Elms," "Maple Grove," "Maplehurst," "Elm-vale," "Fairview," "Clovermead," "Clover Leaf," "White Meadows," "Tanglewood," "Sylvanview," "The Hedges," "Spring Lawn," "Shadeland," "River-side," "Lochdale," "Sunny Heights," "Ridgewood," "Idlewild," "Glenwood," "Forest Home," "Bellevue."

Looking After a Brood Mare.

Our brood mare is due to foal June 30 but she is making milk now. Is there any particular method of feeding advisable, or is it best to let nature take its course? S. L. P.

Ans.—It is rather early for the mare to be showing much signs of milk. Is there a probability that her time is up a month earlier? Sometimes mares foal prematurely, and in such cases may show all the signs. Work or exercise her carefully and avoid too much jarring or backing. Good hay and oats to which a little bran is added makes suitable feed. As soon as the grass comes turn the mare on pasture for a feed each day. A pregnant mare doing work must be well but carefully fed. The grain should be regulated by the amount of work performed.

Four Horse Reins.

How are the lines arranged to drive a four-horse team? J. W.

Ans.—The following illustrations shows methods of arranging reins to drive four horses. There are many ways of

Four-horse Reins.

reining four horses, but these are used by many and evidently give good results. Just the ordinary lines used in driving a team are sometimes used. A strap or rope fastened to the bits of the two centre horses holds them to-

gether and also aids in guiding them when only the ordinary lines are used. Some use reins on the centre team only, and tie the outside horses to a ring on the harness.
