Are the characteristics of

Plymouth Binder Twine

manufacture. Each ball is just as good as it can be made, it contains no inferior fibre or weighting substances, nor does the ball collapse when partly used, as frequently happens with cheap twine, wasting time and twine.
The use of PLYMOUTH saves money and gives pleasure to the farmer, saves money by its great length, gives pleasure by its freedom from tangles, tow and twist and other imperfections that mark the common kind of twine. PLYMOUTH can be depended on at all times, no matter how hard the work or how old the binder.
