

Dish Pan Evidence

Which Dishpan for You?

The practically empty pan contains the only piece used inside Sharples Dairy Tubular Cream Separator bowls. It is smooth, tiny, instantly removable. The full pan contains the disks from a single common cream separator—one of thousands of the common sort that are discarded for Tubulars every year.

The simple, sanitary Sharples Dairy Tubular is the only modern, easy-to-clean cream separator—has twice the skimming force—lasts a lifetime. The dishpans show one reason why every woman should insist on a Tubular.

The manufacture of Tubulars is one of Canada's leading industries. Sales easily exceed most, if not all, others combined. Tubulars probably replace more common separators every year than any one maker of such machines sells. Write for catalog No. 133.

379 Craig St. W., Montreal

Special Notice. BETTER THAN SPANKING.

Spanking does not cure children of bed-wetting. There is a constitutional cause for this trouble. Mrs. M. Summers, Box 821, Windsor, Ont., will send free to any mother her successful home treatment, with full instructions. Send no money, but write her to-day if your children trouble you in this way. Don't blame the child, the chances are it can't help it. This treatment also cures adults and aged people troubled with urine difficulties by day or night.

The Maples Herefords

Canada's Greatest Show Herd
For sale: 6 young bulls and a number of young females, bred from imported and show stock. None better. Prices right.

several exceptionally nice heifers, and a few young bulls. Discriminating buyers will be pleased with my herd. Anything in the herd will be priced. Also ram and ewe lambs. **T. B. Broadfoot, Fergus, P. O. and Station.**

QUESTIONS AND ANSWERS. Miscellaneous.

LUMP JAW.

I have a heifer that has lump jaw. May I breed her, or sell her for beef. Would her milk be all right, or her calf likely to be healthy? I saw something in "The Farmer's Advocate" some time ago that gave me the impression that milk from such was used. **M. H.**

Ans.—You may breed the heifer, but are not legally supposed to sell her for beef while she is affected with the disease, although as a matter of fact the carcass would not be unfit for food, except the parts locally affected. Nor will the disease render the milk unsafe to use, except that possibly it should be discarded during the course of treatment. The calf should be all right.

GOVERNMENT WHITEWASH — CEMENT PAINT—MOCK MAPLE SYRUP—SILO CAPACITY.

1. I wish to paint my outbuildings so as to have them look well. If I put on your preparation called Government Whitewash, will I have to put it on every year. Will the rains wash it off annually?

2. Is Government Whitewash more lasting than cement paint, and can I use buttermilk from creamery instead of whole milk?

3. Can you give me recipe for making maple-syrup mixture?

4. Would silo 8 feet in diameter and 20 feet high be large enough for four head of cattle? Does silage lose feeding value near outer edge of silo?

Ans.—1. In our experience, Government Whitewash on wood gets somewhat weatherbeaten in one year on the south side of buildings, but would scarcely need renewal in less than two years.

2. In his experience, the writer found cement paint the more lasting of the two, but rather more liable to peel off. Buttermilk might be used, but would be less valuable than whole milk.

3. Do you mean "mock" maple syrup? Boil corns, strain, add sugar and boil to a syrup. Flavor with vanilla.

4. Sixteen feet of settled silage in a round silo 8 feet in diameter, approximately 16 tons, would be sufficient for four full-grown cattle for 6 months, provided there was no waste around the edges. If air-tight there will practically be no waste.

TESTAMENTARY.

A dies, leaving as his executors his two eldest sons, B and C. Five years previous to his death, A left his farm and purchased a home in a neighboring village. At time of leaving farm, he took stock of his loose property (which he left on farm), and drew up an agreement between himself and youngest son, D (who was remaining on farm and paying a yearly rental for farm and loose property), concerning said property. A took from D a note for half the estimated value of said loose property. In his will, he does not mention his loose property, nor said note, nor does he mention certain money that his eldest son, B, has borrowed from him, but wills that, after the death of his wife (which took place seventeen days after his own demise), the village property be sold, certain legacies be paid out of it, and, quoting words of will: "All the residue of my estate not hereinbefore disposed of, I give, devise and bequeath to my sons, B, C and D, share and share alike. Now those sons, having kept their three sisters in the dark concerning all transactions, are taking in this note, also borrowed money, as residue, mentioned in will.

1. Do not the daughters, as well as the sons, lawfully inherit their share of this personal property (note and borrowed money)?

2. 1, one of daughters, have asked for and got a copy of my father's will. Can I not lawfully demand a copy of agreement also? We have never known the contents of that agreement.

Ontario.

Ans.—1. No, it goes to the sons as part of the residuary estate.

2. We do not see that you are in a position to do so.

Buy Your Wagon On An Investment Basis—Choose From The IHC Line

YOUR wagon must pay you dividends. It should not be a source of trouble and expense. So we say—buy your wagon on an investment basis. It's the most profitable way in the end.

An IHC wagon is a government bond wagon investment. It will last longer—and do better service while it lasts—than any other make of wagon. It pays the biggest dividends.

A cheap wagon is constructed in a cheap way, of cheap materials with cheap machinery, by cheap workmen. Such a wagon is expensive at any price—when you figure up its total cost.

Thousands of business farmers have chosen from the IHC line. It's the surest way of getting the most wagon-service and satisfaction. You will do well to choose one of these styles—

Petrolia or Chatham

The greatest wagon value in all Canada. Each is a quality wagon—each is up to the IHC standard—not down to any price. Don't be misled by looks—or first price. For paint covers a multitude of wagon sins—and price is too often the only argument used to sell a cheap, inferior wagon.

The best materials are used in the IHC line of wagons. The wood stock is the finest—air-dried; seasoned and inspected at every step—even after the paint goes on. Spokes, hubs, skeins, box, axles, seat, and in fact every part of the IHC wagon is as good as the widest experience, the best materials, the most skillful workmen and the latest improved machinery can make it. Every part is equally good and equally strong. There are no "weak spots" in the IHC line.

Chatham Wagons have a long record for satisfactory service in Canada. Made with hard maple axles, white oak bolsters, sand boards, rims, spokes and oak or birch hubs—they represent the highest standard of wagon construction.

Petrolia Wagons are especially constructed for Canadian service and have proved their merit to thousands of farmers.

Be sure to call on the local International dealer. Get a pamphlet and let him show you one of these wagons. You will note the vast difference between wagons of the IHC line and all other wagons. If you prefer, write for a booklet or any other information you want to the International Harvester Company of America at nearest branch house.
