Mr. Andrew Gray, of the Scotch away from Chatham, he provided for The Planet—with no little inconvenience to himself—a series of letters which were published exclusively in this Great Home Journal. The Planet was deeply grateful for this, as no doubt was every one of its readers, and the excellence of the stopped into the buggy the horse stopped into the buggy the horse stated off suddenly, before Mr. Gray started off suddenly, befo acquainted with more rough-riders who are as courteous and obliging as Mr. Groves, in the matter of contributions. The Ridgetown Dominion says:

'At the last session of the Legislature the Municipal Assessment Act was amended so that the Canada Co., must pay municipal taxes on the full value of the mineral rights retained by the company in lands in this province. The question of whether the Canada Company acted legally and in accordance with its charter in reserving such rights in its deeds to purchasers was also taken up, and General Foy, promised to make full inquiries into the matter, and, if deemed advisable after becoming seized of all the evidence obtainable, make a test case in the courts at the expense of the Province. Mr. Thos. Scullard, of Chatham, was asked to act in the matter, and that gentleman publicly advertised, asking farmers with the 'reserve right' clause in their deeds to come forward and give him all the information possible. It seems that action has commenced and that ere long this vexed question will be settled.

"This is a question in which there is and should be no 'politics.' The farmers certainly have a serious grievance and it has been the duty of their representatives in the Leg-islature to call the attention of the Government to it. It is a positive fact that every member of the Legislature sympathizes with the farmers' view, and the Premier and the Attorney-General both made it plain that the Government's sym-pathies likewise are with the farm-

"It is equally true that the legal members of the Legislature have their doubts as to the outcome. Some their doubts as to the outcome. Some few years ago a private corporation asked its solicitors, a leading law firm of this province, to look into this question, which they did. Their report was not encouraging, still, as Mr. Foy says, it is the duty of the Government to try again, and see if some loophole of escape can-

Canada-German Treaty.

London, Oct. 11—(C. A. P.)—The Magazine of Commerce says the commercial treaty between Canada and Germany will be followed by a direct line of steamers from Germany to the St. Lawrence. Berlin reports state Germany is to be accorded by Canada most favored-nation treatment. "Whether the suggested German steamship line ever becomes an accomplished fact," says The Magazine, "depends largely upon the pessible development and ultimate terms of settlement of the Atlantic rate war."

Poor little menkeys! They get hungry and thed and sleepy just like children. Here is a story of one that lives in Bullalo. He belonged to an open a randow story of the control of the story of the stor organ grinder who stopped in front of a verands where a kind hearted gentle-man sat. When he came up and held man sat. When he came up and held out his little cap for a bit of money the gentlemen, who is very fond of animals, gave him a red cheeked apple. The monkey jumped upon his lap and ate the apple, and between the bites he fixed his bright eyes on the face of his new friend. He must have made up his mind that he would trust him, for as he finished the apple he laid his head against the gentleman's arm and fell asieep. The kind friend of animals paid the organ grinder to play a long time, so that the tired little monkey could have his nap. When he awoke his master pulled the chain, and he followed the organ grinder, much brighter, and happier for the kindness shown to him.

In the middle of the fleor some distance apart place soft cushions, ismpa, brice brac, etc. From among the company choice a very gmart young man who has never "hoazed" and ask him to walk over the course between these articles, so as to fix in his mind the situation and distances of the various things. He is then blindfolded and directed to thread his way among them things. He is then blindfolded and directed to thread his way among them so as not to touch one. Very gingerly he will take his steps and wind about over the fleor, and when, triumphant over his success, the handkerchief is taken from his eyes he is greatly surplied to see that not an article remains on the fleor. All were quickly and quietly removed while he was being blindfolded. It is great fun to see him moving cautiously and taking here and there to avoid impediments that do not exist.

Origin of Sunday. Sunday, as the word implies, is Sunday—the day of the sun. Men worshiped the sun for a long time before they began to worship God, and Sunday was the day on which the source of light and heat received their adoration. On this day Christ's resurrection is supposed to have taken place; hence the Sunday became the worship day of the Christians.
