## CATARRH CANNOT BE CURED

With local applications, as they cannot reach the seat of the disease, Catarrh is a blood or constitutional disease, and in order to cure it you must take internal remedies. Hall's Catarrh Cure is taken internally, and acts directly on the blood and mucous surfaces. Hall's Catarrh Cure is not a quick medicine. It was prescribed by one of the best physicians in this country for years and is a regular prescription. It is composed of the best blood purifiers, acting directly on the mucous surfaces. The perfect combination of the two ingredients is what produces such wonderful results in curing Catarrh. Send for testimonials free.

## JEWELRY STORE LOOTED.

Burglars Make a \$1500 Haul at Durham, Ontario.

Durham, Sept. 24.—Saturday morning Webster's jewelry store was looted by burglars. Over \$700 worth of diamonds, 100 watches that were left for repair, other watches, bracelets, brooches and trinkets were stolen.

The loss will amount to about \$1,500. The Attorney-General's department has been notified.

The diamonds were purchased from Ellis & Co. of Toronto.

Webster has offered a reward of \$100.

There's a story of a farmer and his son driving a load to market.

Of the team they were driving one was a steady, reliable old gray mare, the other a fractious, balky black horse. On the way the wagon was stalled and the black horse balked and refused to pull. "What'll we do, father?" said the younger man. "Well," said the father, "I guess we'll have to lay the load on the old gray." That homely compliment to the "gray mare" suggests how often when there's an extra strain to be borne it is laid on the woman's back. How often she breaks down at last under the added weight of some "last straw." Women who are dragging along wearily through life can gain real strength by the use of Dr. Pierce's Golden Medical Discovery.

Put back in concentrated form the strength-taking material which working women use up more rapidly than it can be restored by nature in the ordinary processes of nourishment and rest. Dr. Pierce's Pleasant Pellets are universal favorites with women because they are easy to take and thoroughly effective in curing the consequences of constipation.

We are all apt to forgive those who do a mean thing when it counts to our own advantage.

Minard's Liniment Co., Limited.

Dear Sirs:—While in the country last summer I was badly bitten by ticks, so badly that I thought I would be disfigured for a couple of weeks. I was advised to try your Liniment to allay the irritation, and did so. The effect was more than I expected, a few applications completely curing the irritation, and preventing the bites from becoming sore. MINARD'S LINIMENT is a good article to keep off the mosquitoes.

## CHEAP POWER SOURCES

Opportunities in Lake Huron and Georgian Bay Districts.

**Hydro-Electric Commission Locates Numerous Places For the Development of Cheap Power For the People—Five Have Appeared to Be Worthy of Serious Consideration—Estimate of Cost Made by Test.**

Toronto, Sept. 24.—The third report of the Hydro-Electric Commission deals with the Lake Huron and Georgian Bay districts. The province is divided into eight divisions, and the two reports and the first and second reports dealt with the Niagara and the Trent Valley districts, respectively.

In the Georgian Bay and Lake Huron districts the Commission report the demand for power at over 16,000 horsepower.

A careful study has been made of the present probable demands for electric power in relation to possible water-power developments capable of supplying these demands, and five developments have appeared to be worthy of serious consideration, namely:

**Maitland River Development.**

(1) Some four miles east of Goderich on the Maitland River at the Ox Bow a development of 80 feet head can be obtained by the construction of a rather expensive dam, which will provide storage sufficient to take care of any reasonable daily peak load within the limit of the temporary overload capacity.

**Saugen River Development.**

(2) At Southampton there is at present a small development made by the Saugen Light and Power Co. under 13 feet head, amounting to some 200 horsepower, and it is proposed to construct a dam below the Indian Reserve creating a development under 40 feet head, which would drop down the present one above mentioned.

**Beaver River (Eugenia Falls).**

(3) The development proposed at this point, as an independent plant, would probably be for about 1,000 horsepower, which is the estimated 24-hour low water capacity, but by combining this development with that on the Severn River, about to be described, the feasible installation at Eugenia Falls and equipment of 2,267 horsepower, with a spare unit of 1,133 added. By this combination, making use of storage capacity, which can easily be created, the above installation can be employed for carrying all the excess of total load in the district dependent on these two plants above 4,000 horsepower, containing power to be drawn from the Severn River development. It will readily be seen that this will reduce operating expenses for the combined system by allowing complete shutting down of the plant for at least twelve hours per day and over Sunday.

**Severn River (Big Chute).**

(4) A development at this point will be less expensive than ordinary, owing to the small investment necessary for head works and canal. Although the power available during an occasional low water period may fall slightly below 4,000 horsepower, the amount can be safely depended upon during ordinary years, and the estimate for works of this capacity, with the usual reserve unit.

(5) On the South River a small development has been estimated on, for the supply of the industrial demands of North Bay, which might also furnish lighting current for Powassan and Callander.

**Undeveloped Locations.**

Among the possible undeveloped locations are mentioned the Maitland River, Eugenia Falls, the Big Chute of the Severn River, the Sturgeon River and Falls, the Moon, Muskoka River, Magnetawan, French and Wahnapitae Rivers.

An estimate of cost of development has been made by a test at Collingwood, and the saving on the present steam operation noted. The capital cost is illustrated by undertakings now operating at Sudbury, \$120,000; Bracebridge, \$75,000; Orillia, \$250,000.

**No Healy Falls Leases.**

"It is imperative," says the report, "that the waters of the Severn, Muskoka and other rivers not yet leased by the crown be retained for the use of the many municipalities which must, for all time, depend on these sources for whatever electric energy they may obtain from water power. It is granted in the future, such lease should specify the rates at which the Hydro-Electric Power Commission may obtain electric power in a condition and quantity at the generating points ready for transmission, or at the points of delivery in the various municipalities."

**Estimates.**

Estimates are furnished showing the annual cost of 24-hour power:

From the Maitland River for Goderich, full load, 625 h. p., \$16.44; three-quarters load, 468 h. p., \$13.75; and half load, 312 h. p., \$9.16.

For Clinton—Full load, 250 h. p., \$22.08; three-quarters load, 187 h. p., \$22.68; half load, 125 h. p., \$23.18.

For Southampton—Full load, 437 h. p., \$21.68; three-quarters load, 328 h. p., \$21.48; half load, 219 h. p., \$23.10.

For Mitchell—Full load, 250 h. p., \$26.47; three-quarters load, 187 h. p., \$21.16; half load, 125 h. p., \$14.68.

For the Beaver and Severn Rivers the centres affected are:

Owen Sound—Full load, 2,500 h. p., \$20.22; three-quarters load, 1,875 h. p., \$21.55; half load, 1,250 h. p., \$22.90.

Menford—Full load, 333 h. p., \$22.39; three-quarters load, 250 h. p., \$22.39; half load, 167 h. p., \$25.36.

Collingwood—Full load, 1,250 h. p., \$21.96; three-quarters load, 937 h. p., \$23.91; half load, 625 h. p., \$27.99.

Barrie—Full load, 625 h. p., \$25.27; three-quarters load, 468 h. p., \$25.27; half load, 312 h. p., \$24.82.

Midland and Penetang—Full load, 1,007 h. p., \$17.99; three-quarters load, 755 h. p., \$18.67; half load, 503 h. p., \$20.47.

Victoria Harbor—Full load, 400 h. p., \$18.63; three-quarters load, 300 h. p., \$19.43; half load, 200 h. p., \$21.21.

Wausauene and Coldwater—Full load, 200 h. p., \$21.07; three-quarters load, 150 h. p., \$22.31; half load, 100 h. p., \$24.33.
