

SOCIAL & PERSONAL

Miss Marjorie Golding of Peel is visiting her aunt Mrs. P. C. Barter. Mrs. C. M. Sherwood of Bath was in Hartland on Tuesday.

Rev. J. M. Mallory will hold service on Sunday 10.30 a. m., at Upper Brightham.

Farmers are still offering shoes and rubbers at bargains. Buy at home.

Miss Clara Hagerman is visiting her sister, Mrs. Henry Long at Lime-stone, Maine.

Alderman Warren White left Tues-day for St. John to attend a meeting of the Public Utilities Board in the interests of the Town of Hartland.

For sale a pure bred laying strain White Wyndotte rooster. Enquire of Mrs. P. C. Barter Hartland. Tel. 4-13. 41-1p.

Miss Hilda Nevers, who is a nurse-in-training in a hospital in Winsted Conn., is now taking a course at the Isolation hospital at Hartford, Conn.

Mrs. Robert Strain has a fine as-sortment of children's hats on dis-play in the Taylor building. Also an-other lot of ladies hats for spring and summer wear.

Car Certified Green Mountains will arrive next week. This car has passed field inspection 10 p. c. Also car Cer-tified True Type Cobblers. Apply to Hatfield and Co., Hartland, N. B.

Mr. and Mrs. Nathan Shaw and son and daughter, accompanied by Mrs. Shaw's mother, Mrs. Tompkins, left yesterday for Detroit.

An alarm was rung in yesterday morning at 5.30 for a box car on fire on the track very near the station. A prompt response by the firemen saved the car from very much dam-age and the town, perhaps, from a severe conflagration.

Joe Adair, who has been staying at the home of George Orser, and working in the livery stable was stricken with a severe stroke of pa-ralysis a week ago. He was taken to his home at Cloverdale when his condition is considered very serious.

The Unique Ladies' Aid of Clover-dale will have a sale and tea social at the home of Alonzo Jones, on the evening of April 9th. Don't forget the date. Come one, come all. 41-2p.

Mr. and Mrs. Arthur Tedford left on Monday for Houlton where Mrs. Tedford will enter Aroostook County Hospital for electrical treatment for throat trouble.

Mr. Charles F. Gallagher of Bath, H. H. Hatfield of Hartland, W. F. Anderson and Robert Carvell of Lakeville left for St. John on Tues-day to attend a meeting of the Public Utilities Board.

Grand carnival in Roller Rink, Har-tland, March 27. Don't forget the date. Don't miss the carnival and you are assured of a good time. 39-2c.

Died at her home in Bloomfield, Car. Co., N. B., on March 17, after a linger-ing illness, Mrs. T. D. Stokoe. She leaves to mourn her husband, one daughter and four sons.

Baby's restless nights might be avoided

Scalded skin and other skin troubles are common causes of restlessness, and often could be avoided by careful bathing with Baby's Own Soap.

Its fragrant lather cleanses and keeps Baby's skin, and prepares for restful sleep.

"Best for you and Baby too" 22-23

M. L. Hayward left yesterday for St. John.

Rev. O. W. Shaw will hold services as follows on Sunday, March 29, Ban-non, 10.30; Cloverdale, 3.00.

The date placed for the play being staged by the I. O. O. F. is April 17. "Look Out For Paint."

Grass-seed in abundance and prices to please the most exacting customers at C. M. Sherwood's, Bath.

Mrs. Coulthard of Fredericton was visiting her daughter, Mrs. B. Taylor for a few days this week.

The Ostermoor is the pioneer cot-ton felt mattress—for over 70 years it has been the finest mattress made. Everything that goes in it is the best that money can buy. That is why it is economical—why it costs (per night of service) but a fraction of the cost of a daily newspaper. All over Canada, in the best hotels and finest homes, Ostermoors are giving fine sleep comfort after 10, 20, 30, years' service. Use the guarantee. For sale by J. T. G. Carr.

Master Harold Howells entertained a number of his young friends on Saturday, the occasion being his eighth birthday. A pleasant time was spent with games and music and each guest presented Master Harold with a gift. Those present were Leighton Ellis, Eleanor Noddin, Frank Noddin, James Miller, Jack Howells, Billie Parsons, Florence Howells and Mag-gie Parsons.

An exceptionally strong sermon was given in the Methodist Church Sunday evening by the pastor, Rev. J. K. King. The text was "Crowned with Many Crowns," and was taken from Revelations. The speaker showed how Christ was being crowned by the many works of Christianity, mentioning the elevation of woman, the freeing of the slaves and other reforms. He regretted that prohibi-tion was not as yet a crown. He stated that there must be the crown of international fellowship and good will before world peace was assured.—that it was only through the prin-ciples laid down by Christ that this could be brought about. He ended his discourse by an eloquent plea for the individual crowning of Christ by each one accepting salvation.

SPRING IS HERE

The smell of fertilizer permeates the atmosphere.

The roads are getting bare.

The wagons are out, likewise the cars; with old license tags.

Children come home every night with wet feet.

Mothers are administering sul-phur and molasses.

The ice in the river looks very sick. Housekeepers are starting on their spring rampage.

Green grass is showing through the ground.

The townsfolk in general are be-

A RILL FROM THE TOWN PUMP

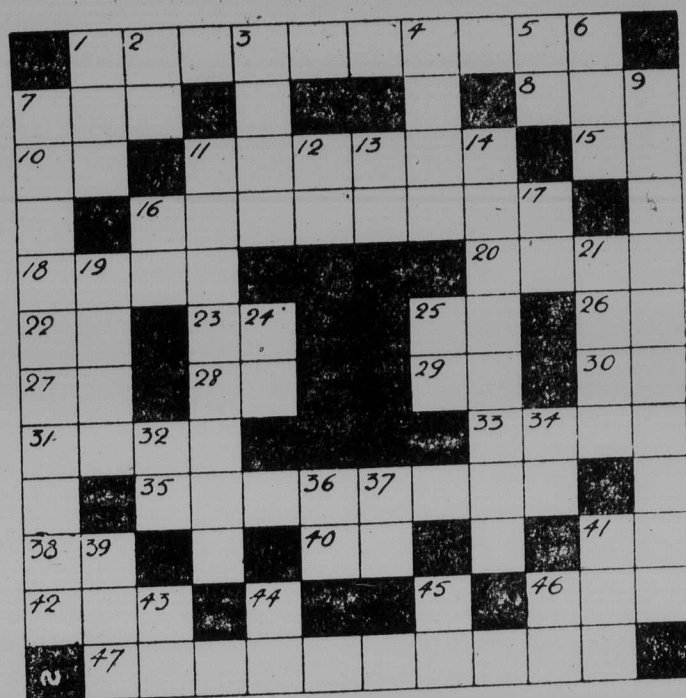

The purpose and object of this ar-ticle is not that of criticism or de-nunciation of the actions of the town fathers, but rather that of ever grow-ing harder and more difficult task of suggestion and approval; together with a few points of interest to each and every rate-payer of the town. At the meeting held on Monday evening Rev. Mr. Lester made a report on the best of his ability on the water situation in the town. We are taking for granted that the figures that he gave at that meeting were arrived at accurately and that they are indica-tive of the conditions as they really are at the present time. Your hum-ble servant in order to augment the report that Mr. Lester made, went to the reservoir yesterday afternoon and found several other figures nec-essary for the completion of the fig-ures that are to be found in the re-mainder of this article. We will not guarantee that the figures are accu-rate to the last place of decimals but they are accurate enough to give us some idea of the facts of the case as they are today. The size of the re-servoir was found to be 31 ft 8 in. by 38 ft 9 in., and the amount of wa-ter that could be put into the reser-voir till the water reached the bot-tom of the overflow pipe was 11 ft. 6 in. This gives the cubic capacity in gallons of the reservoir, which is about 88,000. We next investigated the flow from the spring which is running into the reservoir and found by careful measurements that at five o'clock there were 900 gallons an hour running into the tank. This was measured very carefully and there is little doubt that there was less. Now according to Mr. Lester's report the amount of water in the tank was increased 4 ft 6 in. in two hours. It is very simple to figure that there were 17,344 gallons more in the tank at the end of two hours' pumping, than before that is 8,672 gallons more in the tank after one hour's pumping even with the water being used all over town. Now according to Mr. Lester the level of the tank fell one foot in three hours with all inlets closed. This must have been used by the consumers in the town for we investigated and at the level of the water yesterday afternoon there was no perceptible loss of wa-ter through leakage in the tank. The town then used 2,556 gals. of water with all inlets closed. (This is not an average figure so cannot be used as a basis for the 24. Not as much water is used at night as in day.) These tests were made at almost the same time but on different days so they can be taken as average inputs and outputs. Therefore the pump puts into the reservoir 11,228 gals. every hour it runs, on an average. That is, a total of the amount pumped and amount used. We have to take into consideration the amount of water that the spring puts into the tank. This was 900 gals. an hour. According to Mr. Murdock, who has been looking after the pump and should know what he is talking about, the pump runs on an average of five hours a day at this time of the year. Therefore the pump puts five times 11,228 gals. into the reser-voir in one day or a total of 56,140 gals. To this we must add the amount of water that we get from the spring which amounts to 21,600 gals. a day, making a total of 77,740 gals. of water that the town uses al-together during the course of twenty-four hours.

On first glance this looks like a tremendous amount of water and one would wonder how we have been pumping this as cheaply as we have. We are not starting any argument as to which method of pumping is cheaper. We leave that to the Town Council. We elected them and we are certain that they are competent to decide which is the cheaper. I understand on good authority that there are several springs on the top of the hill that are capable of supplying a great amount of wa-ter. How much we do not know. That remains to be shown. These springs are situated 60 feet above the top of the reservoir and there is a pos-sibility that there is sufficient water available there to supply the town with water continually. We must find out whether there is or not. There is only one way to find out how much water we have available for a gravity supply and that is to hire a man who knows the business and let him make a careful investigation and make his report to the council. Then we have something to work on. At the present time the one small spring that we are using is supplying 900 gals. per hour. If we divide the number of gals. we use in a day by 24 we get the number of gals. that are necessary every hour to keep the town going on a basis of 77,740 gals. per day. This figure is 3,234 gals. per hour that we need from the pres-ent gravity supply. We have an indefinite amount of water. We are at present using water from one small spring. This supply could be great-ly increased by fixing up the remain-ing springs and so protecting them as to conform with the regulations of the Board of Health. Is it not pos-sible that if one of the smaller springs could supply 900 gals., the remaining springs could supply the remainder of the 3,234 gals.? If this can be done, we will have a true, honest to goodness gravity supply of the best water in the country and it will not cost the town near what the present pumping arrangement is costing. Never try and work against nature. It would be better to spend a few dollars and find out for once and for all if we have any grounds for our belief that there is a gravity supply than to go on as we are do-ing, working against nature and spending money that we may find out is unnecessary.—Ed.

coming more active.

Mildred Lippsett presented the town with a full blown branch of Pussy Willow this morning, so there is at least a faint hope that we are and to have spring and later on summer sometime within the next few months.

BATH

March 17—Wendall Wilson, accom-panied by his mother, left here on Thursday last, for Woodstock where he will be employed as junior clerk in the Bank of Nova Scotia.

Mrs. John Commins has gone to a sanatorium in Banfor where it is hoped that she will recover her health, which has been good for some time.

Mrs. Harry Giberson is away from home again, attending on her mother, Mrs. Melissa Derah, who is somewhat better.

The girls in training now have regu-lar weekly meetings, the last of which was held on Friday evening at the home of Miss Marion Crain. These girls have real business sessions, devo-tional programs, and practical al-truistic endeavor in aid of missionary work and or relaxation, refreshment and a social time to wind up.

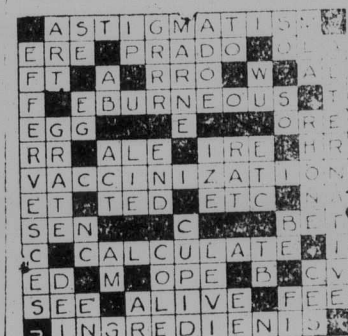

Mrs. Parker is slowly recovering from her recent illness.

A tea and social was held at the

home of Miss Lister, in connection with the Hospital Aid on St. Patrick's day.

Mrs. John Dugan is still on the sick list, but it is hoped by her many friends that she will soon begin to recover her health.
