REFINERY STOCKS

are the most profitable of all investments. Last year Midwest made net profits of \$16,650,000 after providing for everything including the Government tax on profits.

Apex Refining & Drilling Co., about six months old, is already in the paying class. It owns a refinery in operation, and of a capacity of 500 barrels daily, which will be doubled in a few weeks, and will increase this as fast as equipment can be secured. The Company controls 2,000 acres of proved oil land, and is rushing the erection of two drilling rigs which will be in operation in a few weeks. This Company is bound to be a bigger success than Midwest, and will be more profitable.

The stock is due for a big advance right away. Meantime the block we had optioned is nearly all gone. Get in at once while the price is
