There is also a difference of opinion about the Ottawa case. Mr. Hellmuth holds that under this case the eity is not bound to the Cataract contract. Justice Anglin in his judgment said the Ottawa case did not apply here. The city officials are of the same opinion. Ottawa decided to go into the munici-pal lighting business, and was empower-ed to do sc by a special act. A by-law was voted on by the people, and then the city exceeded the powers granted it in the act, and the result was litiga-tion. The consensus of opinion among the city officials is that the Cataract will win out if it carries the case to the Privy Council, and that the city more than it could hope to save in the time of the contract. There is only one way, they say, that the city can avoid litigation and that is by accepting the Cataract contract for five years. Even if the city made no appropriation for power this year. S. C.
