Two-Party Line Telephone Service

NCESSARY curtailment of new construction during the war, followed by the unprecedented development since the armistice, have resulted in a universal shortage of telephone material.

In order to utilize our supply of equipment to the best advantage, to reduce delay in installations to a minimum and to avoid refusing service to anyone, we ask those intending to order telephones to consider the advantages of Two-Party Line Service.

With the central energy system in use here the operator can ring either of the telephones on a two-party line without disturbing the other. The cost to the user is substantially lower than for individual line service.

The rate for two-party line service is, for Business telephones \$30.80 and for Residence \$22.00 per annum.

We will be glad to furnish full information to anyone interested.

One unforeseen eventuality of the influenza epidemic is the possibility that the male citizens may be compelled to dispense with the services of barbers, and go around with locks as long and trailing as those which were in the fashion of yore. Of all the professions which have been hit by the "flu" the tonsorial artist is said to have suffered the worst.
