"NO. ONE" IN THE TOILS

The Notorious Fenian and Dynamiter Arrested at Boulogne—Other Arrests Expected.

Immense Conspiracy Thwarted on the Eve of Being Carried Into Effect.

BOULOGNE, Sept. 15.—Tynan, the notorious "Number One," who was arrested here on a Scotland Yard warrant, issued in 1882, arrived in Europe by landing in Genoa in August. He proceeded from there to Paris, where he remained for some days consorting with a number of the members of the dynamite faction of the Irish party. He had been travelling under the name of George Gedron and other aliases when he arrived in Boulogne on Friday evening and put up at the Hotel Folkestone, where he did not hesitate to expound his Fenian views. His movements had been watched from the time he had arrived in France territory. Tynan admitted his identity in incriminating papers and a large sum of money were found in his possession. The prisoner was lodged in a cell in the Boulogne police jail. The warrant charges that the prisoner was concerned in the murders of Lord Frederick Cavendish, chief secretary, and Mr. Burke, under secretary, in the Phoenix park, adjoining the vice royal lodge in Dublin, on May 6, 1882, and with the manufacture of dynamite bombs for use in England.

Tynan seems to have had no idea that he was shadowed by English detectives from the moment he landed in Europe, and feels his position keenly. He told his captors he knew of no other persons awaiting him if he was handed over to the representatives of the British government. During his continental tour he passed himself off as a Queen's messenger or royal courier, and claimed that the Bell travelling with him was his secretary. Tynan asserted that they were en route to Copenhagen with an autograph letter from Queen Victoria. During his stay at Boulogne-sur-Mer, Tynan had plenty of money. His staple beverage was champagne. There is a strong suspicion that the conspirators were planning the outbreak to occur while the Queen and her suite visited the Queen at Boulogne. It is said that all the suspects were known to have purchased machinery for the manufacture of bombs. Bell, as well as Tynan, is alleged to have been drinking heavily. He is reported to be most nervous, and constantly talking of escape.

Detective Inspector Walsh, of Scotland Yard, said there would be some connection between Tynan's arrest and the arrest of a man named Bell at Glasgow and of J. Wilson at London.

LONDON, Sept. 15.—The first arrest of the man Bell, arrested at Glasgow on Saturday in connection with Tynan's arrest at Boulogne, is Edward. He is described as an American. The Standard has an edition based on a dispatch from its correspondent at Cologne, in which it expresses the belief that Tynan when arrested was preparing for further dynamite operations in England.

At Rotterdam the police captured a number of infernal machines and correspondence which may result in further arrests. Bell was arraigned at the Central police court to-day and remanded until Wednesday.

The Globe, a 28-year old, medium build, clean shaven and sallow complexion. He wore a soft hat and was otherwise dressed as an American gentleman. Bell says he is not a British subject. His papers and other belongings are in the hands of the police, who, it is said, have been shadowing him some time. The police officials have been cognizant some time of the existence of a fresh dynamite conspiracy. It is no reason to doubt that the information in the possession of the Scotland Yard authorities is of the most serious character, although it is difficult to obtain definite facts.

The police of Glasgow received a telegram from Scotland Yard instructing them to follow Bell everywhere, and in consequence a close watch was set over him. Four hours later Bell received a telegram from Tynan giving the latter's address and the address of other taken into custody. When Bell was arrested he asserted that he was an American tourist. The papers found on Bell include documents referring to the three other men in the hands of the police.

The Globe, which has close relations with the government, had along leading editorial article intimating that the arrests were made on information received from one of the recently released Irish political prisoners. It says that this man has also furnished the authorities with evidence in relation to the Clan-na-Gael, and that the government released several prisoners so as not to furnish an exact clue to the source of its information. Dispatches from Boulogne-sur-Mer to the Associated Press say that Tynan was arraigned there before the deputy police prosecutor. He admitted his identity. Two Scotland Yard detectives were present. The prisoner was remanded to jail, pending the arrival from London of evidence.

A dispatch to the Associated Press from Antwerp states that two Irish Fenians, said to be naturalized American citizens, arrived there three weeks ago and rented a house in the suburb of Bechuna. English detectives watched them, their departure from the United States having been known to the British authorities. On Saturday the house was surrounded by Belgian police, but the occupants had fled. A laboratory, however, was discovered, fully fitted with appliances and materials for the manufacture of bombs and explosives. The dispatch intimates that one of these men had already secured a term of imprisonment for complicity in dynamite outrages. The Scotland Yard authorities believe the man referred to in the Antwerp dispatch are the two persons arrested at Rotterdam. Incidentally, it is stated that the men arrested at Rotterdam are Kearney and Haine, not Wallace.

A dispatch from Brussels says that information obtained there from reliable sources indicates that the dynamites whose laboratory was discovered at Antwerp were not Fenians, but Anarchists, whose aim was directed against the Czar. It is known that the police of Antwerp were informed by the Scotland Yard authorities that a plot was in preparation to assassinate the Czar. Many bombs, it appears, had already been made. The police know that one of the conspirators, who is believed to have fled to Breslau, had several infernal machines.

A dispatch from Rotterdam reports that the men arrested there were in bed when the detectives entered the room. Many infernal machines were found in their possession, together with a quantity of correspondence in cipher, the key to which has been discovered. The correspondence is said to have contained plans for dynamite outrages, including an attempt on the life of Queen Victoria.

The London Globe's advice from Boulogne-sur-Mer says that Tynan's disguise was almost complete. He had shaved off his beard and had otherwise changed his appearance. The Globe correspondent adds: "I knew him in Kingston in 1880, and saw him in New York in 1893. He is now minus his whiskers, and his moustache is horribly painted black. He is attired in a light-froed suit, distinctly loud, and, like all Irishmen of his kind, it was his tendency to brag and conspire aloud which led to his arrest. It was at first thought that Tynan was connected with the gang of Paris anarchists who contemplated an upheaval while the Czar is in Paris."

One of the most notorious Fenian leaders, it is said, arrived in Great Britain from the United States some months ago, and the Globe says that time he published an article about his presence, pointing out that there was a revival of Fenianism in progress. As a result of these disclosures, the Globe claims, the Fenian leader alluded to has now returned to the United States.

Incidentally, it was the Globe which first proclaimed the identity of the second man arrested at Rotterdam as being John F. Kearney, of New York, who is charged with being concerned in blowing up the Glasgow works in 1882, a date for which Terence McDermott and others are now serving sentences of imprisonment in Ireland. Kearney went to New York, and it was said at the time, his escape was winked at by the highest authorities.

It was further alleged that it was Kearney who, under the pretence of friendship, led Phelan into the trap when Phelan, the butcher, nearly strangled Phelan in Kansas City, in 1882, at O'Donovan Rossa's office in Chambers street, New York. Kearney may now be charged with the Glasgow outrage, as well as with participation in the alleged present movement.

A semi-official communication upon the subject of the recent arrests of alleged dynamite conspirators was issued this afternoon. It says: "There has been within the full knowledge of the Scotland Yard officials for some time past a gang of desperadoes busily engaged in America preparing the ramifications for an extensive and diabolical plot to penetrate a dynamite outrage in this country and establish a reign of terror."

Chief Inspector Melville, who has taken so prominent a part in arresting Fenians, has been at the head of the Scotland Yard arrangements for checking the present conspirators. Gradually and quietly a complete net was drawn around the plotters, and the fact being known that they were in imminent communication with Russian nihilists in the United States, enabled the police to pursue investigations to a discovery which led to absolute evidence that one of the most recent developments of the scheme was a plot to assassinate the Czar on the occasion of his visit to England. The prime movers were Fenians in America, and when the plot had been carried as far as possible there, the chief agents were sent to Europe to consummate the design adopted. Every preparation was taken in shipping them separately and by different routes. The emissaries of Scotland Yard, however, dogged their every movement.

The semi-official communication then deals with the arrest and capture of all the appliances, documents, etc., and concludes: "It was arranged that Bell should go to Glasgow to superintend a series of outrages in Scotland, the explosives necessary being sent from Belgium as required. Bell had in his possession between £200 and £400 and American letters of credit. Devaney, McCulloch and McCand, three released dynamites who are in Glasgow, have all been shadowed closely since they were released from prison. In 1895 McCand visited America. It is considered probable that Bell will soon be removed from Glasgow to London."

The Times publishes a long letter from H. H. Howarth, complaining of the release of the Irish political prisoners. He points out that the statistics show that mortality in lunatic prisons is less than among people outside of them, and asks: "Is the madness real or feigned?" Continuing, he says: "A newspaper openly said, the case is the Irishmen are acting. The Home Secretary will allow that it is unwise to let a wild Irish screech go from one end of the land to the other about the infamy of English justice, and it is unwise to encourage overheated feelings of Americans toward Great Britain on the ground that we treat our prisoners with barbarity."

In conclusion Mr. Howarth asks the government to make a plain statement of the facts relative to the release of the Irish political prisoners.

TARTE'S CONTRADICTION.

MONTREAL, Sept. 12.—(Special)—Le Cultivateur, Mr. Tarte's organ, says the rumor concerning the alleged submission of the Manitoba school settlement to the Pope is unfounded. Mr. Laurier, it declares, has communicated his intentions to no one.

NEWS OF THE PROVINCE

The Coal City—Good Templarism at Chemainus—Doings in Kootenay.

Interesting Developments—Moyea Group—Work at Beaver Creek—Rich Rossland.

(Special to the Colonist.)

VANCOUVER, Sept. 15.—F. W. Black has won the first prize in the junior essay competition of the Canadian Bankers' Association, his subject being "Method of bookkeeping for a country bank agency, with suggestions for reforms to head office." Mr. Black is on the staff of the Bank of British Columbia here.

Several complaints against the chief of police of alleged negligence are to be considered by the committee.

On the occasion of his withdrawal from service in the Hudson Bay Co., Mr. J. D. Scott was presented with a handsome gold locket by the local staff. Mr. Scott had been in the Hudson Bay Co. for fifty years.

C. S. V. Branch, the newly appointed cashier for British Columbia of the Sun Life, has arrived from Montreal and will be permanently stationed in Vancouver.

The council have been asked to sign the anti-Mongolian petition. They are considering the matter.

It is probable that several unsanitary shacks on Dupont street will be torn down. The owners have been warned to clean them up, but without effect.

On the occasion of his withdrawal from service in the Hudson Bay Co., Mr. J. D. Scott was presented with a handsome gold locket by the local staff. Mr. Scott had been in the Hudson Bay Co. for fifty years.

A conditional deed conveying an undivided half interest on the Gold Hunter group to the Walters company has been recorded. The group includes the Gold Hunter, Alabama and Sun Set Number Two.

J. T. Wilkinson, of the Vancouver patent attorney for Robert Jack McVeeley, who had just sold his interest in the Mountain Chief mineral claim to Judge Dixon and received his money, amounting to \$1,600.

Judge McCreight has passed sentence on Everett, Kellem, Thompson and Chatterton, sentencing them to four years each in the New Westminster penitentiary for robbing Jack McVeeley, who had just sold his interest in the Mountain Chief mineral claim to Judge Dixon and received his money, amounting to \$1,600.

WESTMINSTER, Sept. 15.—The steamer Dece of Westminster is to be used on the Slooan lake, plying between the mining camps.

Prof. Prince has asked Inspector McNab if it would be advisable to permit salmon fishing from the 16th inst. and on an affirmative reply. It is probable that permission may be granted to commence fishing at once.

NANAIMO, Sept. 14.—A few days ago, James Craig, provincial road foreman, while following a path near the mouth of Beaver creek, was surprised to see his dog stop and commence pawing at the ground. On searching he found about 16 inches from the surface, the head, horns and hide of a young heifer. It is since thought that cattle thieves have been at work.

A number of very fine specimens of free minton quartz recently taken from the Van Andra mine on Texada island, were brought down by the Joan. In one of these a piece of gold three-quarters of an inch long and nearly half as thick was imbedded.

Postmaster Horne has placed in the Free Press window a sample of quartz taken from the Horne and Thomas claims, situated on the McLaughlin Range, north of Armstrong, in western Alberni. The veins from which the rock is taken are wide and well defined, and there is also on the same ledge a whitish quartz exactly similar to the Alberni ore, which is from 30 to 40 feet wide.

CHEMAMUNUS, Sept. 12.—The funeral of Mr. Leonard Dodgeon, who died very suddenly of apoplexy on Wednesday last, took place to-day, Rev. Mr. Miller, of Cedar district, conducting the burial service.

Dr. Lewis Hall, of Victoria, paid an official visit to the Chemainus lodge I.O.G.T., the result of his visit being increased interest in the work. Mrs. McDiarmid, S.E.T., has organized a Juvenile Temple.

Rev. Mr. Cleaver, of Victoria, held service in the school house on Sunday. Mr. Arthur Howe is putting up a neat little cottage. Mr. James Crozier is finishing his new house. Mr. Ward is building an addition to his residence, and Mr. Wilson has almost completed his house.

The Kosciuszko is loading lumber for Western Australia. The Colorado of San Francisco is expected.

KAMLOOPS.

(From the Kamloops Sentinel.)

Tom Mitchell, C.P.R. brakeman, recently lost a foot, having been run over by an engine at Craigallachie. His lantern went out and he stepped over to the other track to relight it, thinking that he was on the track that the engine was coming on, but unfortunately he stepped on the wrong track, his consequence being that the engine knocked him down and took off one foot.

A singular and fatal accident recently happened to the infant child of Joseph Gasse, a settler on Campbell's creek. The mother was lifting the child out of a wooden hammock in which it had been lying, when it slipped from her arms and fell with its back across the upright edge of the board which formed the side of the hammock. The child's head fell back there was a slight gurgling at the throat and the little one expired.

FORT STEELE.

(From the Prospector.)

A new strike of gold quartz is reported on Weaver creek, where a number of prospectors are.

Mr. Sussman, of the C. P. R., and Mr. Stafford, of the Galt Coal Company, were in the Crow's Nest Pass recently cultivating the coal fields, and both expressed themselves highly pleased with what they saw.

David Griffith, who returned from Bull river on Tuesday, reports that his property is looking well. The ledge is about seven feet in width, and has well defined walls. The ledge matter is well mineralized, and assays give the following returns: Gold, 47; silver, 16 ounces; 33 per cent copper and a large percentage of lead.

The owners of a number of claims on Perry creek will winter there and develop their property as fast as possible. There are a large number of men at work on the Moyea group of mines. The St. Eugene has nearly 4,000 tons of ore on the dump, the Moyea has lately struck a large body of galena, and the Lake Shore also has some galena in sight. In the near future this will make a large silver lead camp.

Steel head salmon are reported to be very thick in Departure bay this week. It is rumored that the steam collier Wellington will be put in commission inside of the next few days.

The loading apparatus at Departure Bay which was described recently has been improved in many minor details, and works now as well as the inventor could hope for. The capacity of the machine seems to be regulated only by the supply. A train load of coal can be loaded in seven minutes, and between 4,000 and 5,000 tons could be loaded in one day.

ABSOLUTELY PURE

FOREIGN INSURANCE. DYNAMITERS ARRESTED

Protection for Canadian Policy Holders—Intoxicating Liquors Prohibited in Commons.

Laurier Modifies His Chicago "Record" Interview—Grain Standards.

(From Our Own Correspondent.)

OTTAWA, Sept. 14.—The Senate to-night had a discussion on Mr. Loughheed's bill respecting foreign insurance companies. Sir Oliver Mowat stated that if the silver party become dominant in the ensuing presidential election in the States, the government would be disposed to accept an amendment to the insurance act requiring Canadian claims to be paid in gold.

The House of Commons to-night, on motion of Mr. Craig (Con.), unanimously passed a motion instructing the Speaker to issue an order prohibiting intoxicating liquors within the precincts of the house. Mr. Craig sharply reproved the Liberals for claiming credit for the recent order, which meant nothing. Now he proposed to test their sincerity. Mr. Laurier said if the feeling of the house was in favor of the motion the government would not oppose it.

Sir Charles Turpin said much the same on the part of the opposition. Mr. Ellis said the resolution would be meaningless unless the Senate passed a similar motion.

The resolution was put and carried with a dissenting voice. Hon. Mr. Laurier said to-day that he knew nothing of the report that Mr. Greenway is coming to Ottawa for a further conference on the school question.

The government announced to-day that the unsold portion of the Thousand Islands would be withdrawn from sale.

Mr. Laurier modified his Chicago Record interview to-day by admitting that he was not thoroughly conversant with fishery matters in the Maritime Provinces. All he wanted was an amicable settlement of the fisheries dispute with the United States, and especially the abolition of purse seines. It is currently reported that Mr. Martin will get neither a judgeship nor a portfolio, and that he is coming down here to make arrangements with a Manitoba local member to vacate his seat.

Sir Frank Smith gives a categorical denial to the report that he is to marry Lady Thompson.

The Canadian Refinery Company obtained to-day a verdict against the crown from Justice Burbridge in the Exchequer court. The company received a cargo of about 86,000 pounds of raw sugar about the time the new duty of half a cent a pound by the tariff duty of 1895 was imposed. The vessel was reported at Sydney, but by the time it reached Montreal the amount involved is about \$43,000. To doubt the government will make an appeal to the Supreme court from this decision.

Judge Burbridge also gave judgment to-day in favor of the American Dunlap Tire Co., and granted an injunction to the American company to prevent the Dunlap Tire Co. from selling or disposing of about 86,000 pounds of raw sugar about the time the new duty of half a cent a pound by the tariff duty of 1895 was imposed. The vessel was reported at Sydney, but by the time it reached Montreal the amount involved is about \$43,000. To doubt the government will make an appeal to the Supreme court from this decision.

Dr. Bell-Irving, of Vancouver, has bonded the Neepawa, Baker Fraction and Argosia, on Teas-Mile creek, for \$48,000. The terms are 10 per cent down, 10 per cent in ninety days and the balance in one year. If the survey be satisfactory the bond for \$18,000 will live and be payable on the same dates as the other.

Assessment on the Mako, on the north fork of Carpenter creek, has caused the paymaster to widen several inches, displacing plenty of antimonial silver.

An agent of Paisey Clark recently offered a bond of \$40,000 on the Lillie B., of Spruce creek, but the terms were not satisfactory and the owners would not entertain the proposition.

ENGLISH SOCIETY.

LONDON, Sept. 12.—During the past week there has been a number of heavy rains accompanied by thunder and in some places strong winds. The harvest, however, is complete, except in the most northern parts. The weather in all parts of the United Kingdom has been miserable, and has greatly interfered with the pleasure of partridge shooting, racing, and in fact all kinds of sport. There was a great gathering, however, at the Doncaster races. Nearly all the places in the vicinity had large house parties. The Prince of Wales was the guest of the Earl of Crews, at Fryton Hall, and the Earl of Wharfedale entertained the Duke of Cambridge and party at Wortley. The Wilsons had a large party at Tranbycroft. The guests included the Earl of Dudley, Lord Marjoribanks, Countess Cairns, Lord Edward Somerset and a number of others. Most of the hosts took their guests by special trains daily to Doncaster. The Prince of Wales' win of the St. Ledger stakes with Persimmon, while almost a foregone conclusion, was very popular. The Princess' portrait was to be seen in every store window at Doncaster.

MANITOBA SCHOOLS.

MONTREAL, Sept. 14.—Archbishop Langevin, of St. Boniface, is the guest of Rev. Abbe Therien, of the St. Louis institute. He is en route to Winnipeg from Rome. He attended the schools, he said. "My attitude is the same as it was before my departure." This is taken to mean that His Grace will insist on obtaining all that the remedial bill called for. From friends of Archbishop Langevin it is learned that Mr. Laurier has not yet consulted the representatives of the minority. It is also learned that the Pope will insist upon the vested rights of the Catholics. Archbishop Langevin will remain in Montreal a week.

Discovery of a Bomb Factory and Arrest of a Number of Persons.

Tynan One of the Principle Parties—The Press on the Developments.

ANTWERP, Sept. 14.—Yesterday a dynamite factory was discovered here and a number of persons, among them the well known Tynan, were arrested in connection with it.

LONDON, Sept. 14.—A dispatch from Boulogne to the Associated Press says that Tynan spent Saturday evening in the bar of an hotel drinking and standing for drinks freely and talking politics. He retired to bed intoxicated at
