Does your butter work to a "paste" before the salt you use dissolves?

Poor salt spoils what might be good butter. A sharp-grained salt is practically insoluble.

Windsor Salt dissolves easily—it is "taken up" in the butter with very little working. Progressive grocers sell

Farmers' Binder Twine and Agricultural Implement Manufacturing Co., Limited.

(BRANTFORD, ONTARIO).

WE think it necessary to immediately advise you to refute the treacherous and damnable reports that are being put out and circulated against this co-operative movement of farmers by our enemies. Some are stating that this mill is closed down, others that we are pleading with the Government to reinstate the duty on binder twine; others that raw material has so tremendously advanced, that the present moment is the correct time to buy twine requirements for the harvest of 1898; while still others are claiming that the great American combine must absorb this enterprise, as it will be impossible for us to manufacture twine on a free trade basis. We have simply to say, in answer to all these diabolical statements, that there is not a single word of truth in them; the mill is being run three hundred days in the year to its utmost capacity; we have requested the Government not to reinstate the duty on twine; and we are just now manufacturing a quality of pure Manilla 650 feet long, known as our Sampson brand. It and our splendid Red Star (the farmer's pride) are superior to anything that has ever yet been placed on the Canadian market. As in the past, we will again shortly set prices on binder twine for the coming harvest at a fraction above actual cost of production, that all other manufacturers and dealers will have to follow. All we now ask, after five years of honest and determined endeavor in the interest of agriculturists of Canada to hold this Company as an independent concern, is that they, the farmers, give us their continued loyal support. Order our twine early from our appointed agents, listen to no statements made by the enemy, and remain truly loyal in not purchasing one single pound of American or other twine in opposition to us until they inform themselves positively that every ball of this Company's twine is exhausted. Small samples and prices will be sent you in the near future, or can be had on application.

See copy of a letter enclosed that appeared in *The Farmers' Weekly Sun*, February 24th, for your careful perusal. We specially request you, as an intelligent man, to plead with your people to realize the importance of this company getting their undivided individual support instantly, and to understand what our being driven from existence through indifference or scepticism on their part would mean to them in the future. The Salt Act would simply be repeated a hundredfold.

General Manager, Brantford

Faithfully yours,
JOSEPH STRATFORD.

SPRAMOTOR DISINFECTING APPARATUS

THE SPRAMOTOR has scored another success. It has been found that tuberculosis in cattle can be prevented by its use. Now, don't be an old fogey and say "I don't believe it," because your disbelief will not destroy its virtue, and you should eschew all new methods if you would lose the race. Can an up-to-date stockman afford to be without a modern appliance for disinfecting his stables and buildings? If you think he can, and remain of that belief long enough, you are likely to have it cost you dear. We can supply you with formula and directions, as well as the only satisfactory apparatus made to do painting, whitewashing, spraying, disinfecting, etc., at the lowest possible price.

CERTIFICATE OF OFFICIAL AWARD:

THIS IS TO CERTIFY that at the contest of Spraying Apparatus held at Grimsby, on April and 3rd, 1896, under the auspices of the Board of Control of the Fruit Experimental Stations of Ontario, in which there were eleven contestants, the SPRAMOTOR, made by the Spramotor Co., London, Ont., was awarded FIRST PLACE.
