

Barrett Specification Roofs

City Building
St. John, N.B.
Canada.

Roofed along the
lines advocated in
the Barrett Spec-
ification.

After Twenty-Seven Years of Service

THE roof of this structure was laid in 1882. A letter recently received from the contractors states that it is still in good order *after 27 years of service.*

As compared with other kinds of roofing, and considering the wide variation of temperature in New Brunswick, this is an astonishing record. It emphasizes the satisfactory results which Barrett Specification Roofs invariably give.

The architect or owner of a building who will order his roofing laid "according to The

Barrett Specification" and *insist that the Specification be followed to the letter, is absolutely assured of satisfactory service.*

It is well to remember that with Barrett Specification Roofs there is no maintenance expense whatever. Metal and Ready Roofings *require paint and attention every few years* to insure freedom from leaks and trouble.

Every architect, engineer and owner should have The Barrett Specification on file. We will send same promptly to anyone interested on request to our nearest office.
