VEH LAISARY CHIPS.

Diagnosts of Programmy, -In a clinical In classifit to bath softhe heart of the futures a means of recognizing the state of pregnancy in the 4 mestic animals. After mentionia; the history of the first discovery of this heart action in women, by Mayor of Geneva, in 1818, then the mentioning of the Bame by Lar 8 , and later by Lanzillotti, he describes to a personne non as follows : " Apply y or car ap n the delominal walls on the restarce, a little to low the flank, and listen attentively. You so n will hear a succession of light repeated noises, perfectly rhythmatized, s parted by a moment of silence and p if city rep ating the beatings of the heart aus uttated in the adult. These noise ar very weak, though very distinct, when with attent on, once they are caught by the ear. They resemble much the tic-tac noise of a waten, and utly these are the Lac nots protef the mother, they are too recol on their connercus-nearly double magiven um . The significance of this phenomenents of great importance, as to the live condition of the futus; it is claimed that these morses are autible after the 25th week or about the 6th month of gestation, though they may be heard sooner. This is a precious and new sign for the diagnosis of programmey, wrich will be of great advantage to the breeder and practitioner.

THE SOURCE OF WORMS IN ANI-MALS.

In a recent lecture on " Parasites in Animals," Professor Lew stated that a prolific source of nin-wozins and other species which are found in animals, man included, is impure water. The ova or eggs are contained in the water that animals drink; hence the great importance of providing that which is pure. Run-water is free from them in a great measure, but pools of stagnant water are full of them. It is not natural for animals to be infested with worms, as some writers have asserted.

GOOD-BYE, TOE WEIGHTS.

Mr. F. B. Akers, of L-wrence, Kansas, writes to Dunton's Spirit of the Turf, under the above heading, as follows:

It has long been my desire to discover, or have some one find out, some way of dispos- undertook to assert that only dead meating with the weights. One day a pacing colt would be found a profitable export from this pulled away from my groom and away he country: - Eighty-one very fine Canadian went down the lot, with the halter shank hitcattle were landed yesterday by Dominion ting his forward feet and legs every step. line steamer Mast-sippi. Extensive arrange-Troiting a three-minute gait, no signs of a ments ar being rapidly pushed forward by pace, but a big, open-gated, high-stepping this company to fit all their steamers for the trot. In less than two hours I had a pair of purpose of conving weekly shipments of leather strap-made to buckle above the knee, not less than 300 neasts (alive), with the adwith other straps attached to them running dition of large quantities of dead meat, direct. downwards to the foot every 21 inchs. I found my straps had the same effect as the Away he went trying to step halter shank. over the loose straps that were hitting his legs in a big trot. I aft rwards tried them on a pacer, that toe weights had failed to change and he trotted from the start. Of course there are cases that my discovery won't reach where toe weights have to be used, but where we ghts are used to stop hitching, knee knocking, and to change a racker, pacer or single gaited fellow to a square trot, I believ. I have discovered the tools without any of the evils of using too weights-and expect a vote of thanks from Berg and his society for the prevention of cruelty to animals.

111 YEARS OF AGE.—Mrs. Mary Nixon, mother of Mr. Varna Nixon, late of Hibbert, but now or Struckerd, is easil to be 111 years of age. She is well able to thread a needle, and do as much work as many younger wo-

against and a Social witnesses were called, the time he will control of the arrow in regard to the te time no of whom tended to he the guilt on patients of that arose in regard to the paternity of that extraordinary trotter; the pacer, Wilson's Snow Storm, having put in a claim for that honor. The case still remains on the docket, and after weighing all the evidence thus far presented, we believe the son of imp. Knight of St. George and imp. Melrose as having established the clearest title thereto. He was subsequently repurchased by Mr. Richards and returned to the stallion quarters of Blue Grass Park, and here he gave early evidence of his beture, delivered by Processor St. Cyr. that quality by contributing such fine perform-emin at yet rinarian called the attention of crs as Grit, Manie Michon, Mettle and others; and the first named of the trio, in his two-yearold form, last year, ran the mile route, at Sallatin, Tenn., in 1:14½, the fastest on record at that age. At Nashville, Tenn., on Tuesday, May I, as the shadows of death were closing around Melbourne, two of his get-Milan, out of Alumin c, and Bethune's entry, out of Mag netta -- carried away the honors of the day, the former winning the Young America Stakes No. 1, at half a male, in :593, defeating a field of ten starters, a d the latter winning the Commercial Hotel Stakes, for three-year-olds, at a mile and a quarter, in 2:14. Melbourne, Jr., bay, was bred at Blue Grass Park, foaled 1860, by imp. Kinght of St. George, dam imp. Melrose, by stelbourne; 2nd dam Clarkie, by Muley Moloch; 3rd dam Sister to Brighton, by Palmerin, &c., then through Oceanu, by Cerberus, ic a mare by Damond, his 15th dam. Melroso was the dam of Target, also imported by Mr. Richards, and she produced Cree-Imoor, a race-horse of great ability of also roduced Edize Davis, the dam of W. Sane, War Cry, War Cull, &c.

CEMENT FOR CRACKED HOOFS.

Mr. D fay has discovered a preparation, by means of which sand-cracks or fractures in ho for hora may be durably cemented up. Longer sor from can be secur ly joined tige her by its means. The only precaution it way for its successful application is the car for removal of all grease by spirits of salammonae sulphide of carbon, or either. M. Defay makes no secret of its composition, which is as follows: Take one part of coarsely pewder gum-ammoniacum and two parts of gute opercas in pieces the size of a hazel nut. Put them in a tin-lined vessel over a sl w fi.e, and stir constantly until thoroughly in x d. Before the thick resinous mass gets cold, mould it into sticks like scaling wax. The cament will keep for years, and, when required for use, it is only necessary to cut off sufficient quantity and remelt it man dr.t ly before application.
