

NESTLE'S MILK FOOD.

Trade

Mark.

ITS PREPARATION AND VALUE FOR INFANTS.

Preparation.—For an infant under three months mix one teaspoonful of the Food with ten of hot or cold water, hold over the gas, lamp, or stove with constant stirring, until it has boiled two or three minutes. Cool to about blood heat, and give in feeding bottle. For a child three to ten months old, mix in proportion of eight of water to one of Food. For a pap in proportion of five of water to one of Food.

Value.—Containing only Milk, Wheaten Bread Crust, and Cane Sugar (as stated in No. 1), this Food supplies all the elements necessary for complete alimentation in the most easily assimilable form; the milk furnishing casein, albumen, hydrates of carbon and sugar of milk, while the wheaten bread crust supplies nitrogen, and is especially rich in saline matter, particularly in potash salts, mainly in the form of Phosphates, and carbon is obtained from the cane sugar. It makes pure blood, firm flesh, hard muscle, and tough bone. It is a sure preventive of summer complaint, and by its use the bowels can be kept in just the state desired. The simplicity of its preparation, and the uniformity obtained are two points the value of which cannot be overestimated.

Particular Attention.—We do not claim that this Food will agree with all children; we do not think that any artificial food will ever be made which will do this, as nature sometimes fails, a mother's milk not agreeing with her own child. We only claim what has been proved by its use for fifteen years past, that it will agree with a larger proportion of children than any other artificial food.

We shall shortly address you with reference to this Food as a substitute for woman's milk and cow's milk.

A pamphlet by Prof. H. Lebert, of Berlin, giving full particulars of the Food, sent to any address on application to

**THOMAS LEEMING & CO., Sole Agents,
MONTREAL, P. Q.**

For a perfectly pure condensed milk, free from starch of any kind, try **Nestle's**.

Fig. No. 8 is a comfortable support to the abdomen, but is not so effective as No. 8 in supporting the bowels, spine or chest.

THE IMPROVED BODY BRACE.
