LONDON, Sept. 25.-Prince Bismarck has pronounced the extracts from Emperor Fred- malignant throat diseases, I, :ogether with erick's diary apochryphal, and his organ in- some of my colloagues, have made some very dustriously throws doubt about their authen.] careful researches into the causes of this, and ticity. But it will be observed that doubt is finding that males were almost exclusively cast not on the matters stated as facts, but on their being correct transcripts of the diary. The Emperor's nobility is rovealed in the diary in a manner to challenge the admiration of the ary cigarette injurious; but am persuaded world. It is easy to make people believe that that the cigarette imported from Egypt cr he would not put matters in a diary that might best be kept secret, even when he has passed beyond the range of responsibility for their expression. But Biemarck and his organ do not dony the matters said to be stated. The portion of opium and an unclassified alkaloid denial really is one of a kind that admits by denying the lesser matter that it proves the greater.

greater. An important change is about to take place in the Court of St. Petersburg. Prince Wor-ontzow Daschkow, Minister of the Imptrial honsehold, will shortly retire from his effice, our honsehold, will shortly retire from his chae, one of the most important in the empire, to be suc-ceeded by General Richter, chief efficer of the honsehold. Prince and Princess Worontzow have been in high favor with the Czir and Czarina for many years. Of late their star has been declining, the great favorites at present being Col. Scherematiew, the Emperor's aide de comm. His wife, the grand daughter of Embeing Col. Scherematiew, the Emperor's nide de camp. LONDON, Sept. 23.—Excitement over the revelations in Kaiser Frederick's diary is tur-ning very high in Germany and Bismarck posted off to Berlin and Potsdam in hot haste to off to Berlin and Potentin in his have to have to have the things that strengthen the mutcles, confer with Emperor William on the subject. It is now clear that the young Kaiser know nothing of the matter until it was pub-lished. Earmarks of the authenticity of the extracts are in every paragraph. What does seem probable is that Frederick worked on the register and amplication of this matter

given way in public interest to the Whitechapel murders. The matter has been discussed in all ways. Much indignation has been expressed at the incompetence of the police and the neglect of the Home Office to reward as requested. The murders have been the sole topic of the district affected from the first, and great ex-citement has prevailed, but it was comparatively subdued on Saturday. But on Sunday morning the town was horror stricken when the news of two more of the same kind of murders was howled through the streets of London. The murders were marked by the same mutilation of the victume, selected from the same class and howled through the streets of London. And murders were marked by the same mutilation of murders were marked by the same mutilation of the victims, selected from the same class and committed by a villain who leaves no sign behind encept that one of the latest two victims had only the throst cut. Bubas' murderer commit-ted two instead of one murder. He probably though his sign manuel should be recognized for the two even if he placed it on one only. The celerity wish which the perpetrator does his work can be judged from the fact that the vic-tim found in Mitre Square was murdered be-time the minutes after the patrol of the police-man and he butchered both in forty-five min-ues. Much attention is paid the theory advanc-ed by Dr. Forbes Winslow, the celebrated mad doctor, who thinks that the series of murders were perpetrated by a person suffering from epdoctor, who thinks that the series of murders were perpetrated by a person suffering from ep-ileptic mania. The pecularities which are par-oxysms only occur at intervals, and leave the person in partial possession of his faculties. Such epileptic selzures of this kind are frequent-ly accompanied by a form of erratic frenzy, which would account for the particular class of women attacked. There is something peculiar-ly ghastly in Dr. Winslow's idea that the mur-dertr may be a man of good position, and that ty gnastly in Dr. window's mea that the mur-dertr may be a man of good position, and that when temporarily paroxysm has passed, and thirst for blood satisted, he may quickly return to the bosom of his family.

I am not by any means one of those who consider the pipe, a cigar, or the ordin-Turkey is mixed, presumably to give it a peculiar taste or flaver, with some insidicus poison. I am led to this conclusion by a careful analysis of both the home manufacture and that of the foreign ; in the latter a large prowas manifest, which was totally absent in the former ; and it will be obvious that an irrituut poison constantly brought into contact with the region of perhaps the most sensitive part of the human organizatior, is calculated to bring about trouble. I will not trespass on your space to go into further minutia, or give a longthy account of the experiments that ra-suited in the conclusions arrived at ; suffice it for the present, that I venture to address you in order to caution the public against a serious danger that lurks in their midst.

NEW ZEALAND'S EARTHQUAKE. THE DISTURBANCE THE MOST SEVERE EXPERI-

ENCED FOR MORE THAN TWENTY YEARS. SAN FRANCISCO, Cal., Oct. 1.-The Australian mail on Saturday brought details of the great earthquake on September 1, which was mentioned in a brief cablegram from Auckland at the time. The shocks were peculiar and were heaviest near Hammer Plains, Hot Springs. New springs were formed and some of the phenomena that attended the destruction of the terraces in the Auckland district several years ago were ob-served. The earthquake occurred shortly after four o'clock on the morning of Sep-temper 1, and was the severest in New Zealand for more than twenty years. It was felt throughout the north island and a portion of the south island. Its direction is given variously as northeast, southwest and east to west, while its duration is estimated at fully a minute.

At Christ Church the effects were most alarming. The first shock was followed at intervale by four others, extending over half an hour. The whole city was aroused. The people rushed into the streets momentarily expecting the shaking buildings to collapse. Wall pictures were thrown down, and there was immense destruction of glass and crockery. The bells of the Cathedral were made to toll by the rocking spire, and immediately afterwards about 20 feet of the spire came crashing to the ground. A large number of ohimneys fell and many buildings woro cracked.

The people camped in open lots for several bours, but finally the excitoment abated and they returned to their homes. No loss of life or injury to limb has been reported, but there were some narrow escapes. On the high bluff blacks of rack 100 tons in weight gave way and went into the harbor with a crash, carrying fences and other obstructions.

The shock was heard all over Canterbury district. It was most severe in Christ Church and the district north of it.

The steamer Porto Rico, which arrived in Lyteliton, felt the shock when off Kaikoura At Westport shocks continued from four o'clock until nino ; the first shock was must violent and prolonged. The initabitants wars greatly terrified. A number of brick chimneys were cracked and otherwise danaged at Groymonth. The houses cracked and rocked like vessels at sea. As Katkeurs people rushed into the street in their night clothes. Damage is reported throughout the island.

WEAR A SMILE.

Which will you do-smile and be happy, or he crabbed and make others around you miserable ? You can live as it were smong beautiful flowers and singing birds, or in the mire, surrounded by fogs and froge. The amount of happiness you can produce is incalculable, if you show a smiling face and a kind heart, and speak pleasant worde. Oa the other hand, by sour looke, cross words and a fretful disposition, you can make a number of persons wretched heyoad endur. anco. Which will you do? Wear a pleasant countenance, let joy beam in your eyes and love glow in your face. There are few joys so great as that which springs from a kind act or a pleasant deed, and you may feel it at night when you rest, at morning when you rise, and through the day when about daily

England's war with Thibet has assumed a new and important phase. The Thibetan's have for-tified both the Jalapla and Pembering's passes by building walls across the roads and several hundred yards up the hillsides. The lowest wall in the former pass was 800 yards from Kapup valley; 400 yards beyond and higher up was a second wall, with a group of tents pro-tected hy abatis; 200 yards further up still a circular fort stood on an acclivity of the right road, and near by were more tents. Still ano-ther wall about a mile long had been built across ther wall about a mile long had been built across the Jalapla pass. Such was the description given by the British military papers of the sin-gular fortified camp, S,000 strong, which has now been taken at the point of the bayonet by Gen. Graham's troops, 1,800 strong, inflicting on its defenders a loss of 400 killed and wounded. But the combined advance of Gen Graham's 108 Generation a loss of 400 killed and wounded. But the continued advance of Gen. Graham's forces in audacious disregard to the theory that Thibet is "sacred soil" is still more import-ant and may indicate a purpose to claim territo-rial indemnity. To have made this advance with his small force in a mountainous region and for way from his base of supplies indicates no far away from his base of supplies, indicates no ittle enterprise on General Graham's part.

LONDON, Sept. 27.-It is reported upon what seems good authority that the Half-penny Post | cook ?" Company has secured a concession from the Postmaster-General which will bring a private Postmaster-General which will bring a private trading concern into competition with the public department. There are used in the Kingdon 170 million post cards annually. The new competitive scheme is to issue a half-penny stamped envelope with note paper attached. The arrangement is innote paper attached. The arrangement is in-genious. The idea of the inventors is that the genious. The loca of the inventors is that the public will jump at the concealment thus offered, the contrivance being in fact a closed letter at the price of a post card. It seems that under this system the penny stamp itself may be genious. concerned to the embarrassment of the department, but Mr. Raikes, who has treated the subment, but MIT. Raikes, who has rested the sub-ject to an actuary's calculation, estimates a saving to the nation of over 350,000 pounds annually. A feature of the half-penny letter will be a eide for advertisements, and it will be sold by stationers and news vendors.

LONDON, Sept. 28.-Bismarck's determination to prosecute the Duitsche Rundschaw by permission of the Emperor is the easiest way power finds to meet facts. Bismarck picks flaws in the extracts from the diary, but the public has more faith in the diary than in Bismarck. The latter has purposes to serve that may require the use has purposes to serve that may require the use of truth or falsehood, and statecraft considers either a legitimate weapon so long as the end desired is gained. The diary is impersonal, it speaks only what it has held in the same form speaks only what it has held in the same form for years. It has no end to serve except to reveal exactly what was written on its pares. The writer has passed beyond earthly ambitin, recording at the time the occurence of events. The probability points to the accuracy of the record. Such being the case, and such evident-ly being the public's opinion, the iron Chancellor has no weapon left but the last resort of tyrents, the nuzzling of the press. The Germans hive serious work on hand in the set of the serious work on the set of the

East Africa along three hundred miles of the Zanzibar coast, between Pangani on the north Zanziosr coast, between Furkan on the north and Kilwa on the south. They have been at: tacked by coast natives at five stations and several Germans have been killed. This uprising has speedily followed a ceasion to the Germans by the Sultan of Zanzibar of this and Germans by the Sunau or Zanzioar of this strip of coast, five hundred miles long by ten wide. The immediate pretext of the rebellion is the violent disinclination of the coast people to accept the sovereignty of Europeans. The real caute is the affiliation of the coast natives with the Arabs of the interior. London, Oct. 1.-Birmarck, the Emperor's

Meanwhile remain assured that within my territory you shall enjoy every protection compatible with internal obligations toward your husband and the Servian Government." On July 5th the Emperor wrote Queen Natalie as follows: "As a result of my enquiries I cannot support the apposition which Your Majesty considers yourself bound to display to the demands of King Milan for the return of the Grown Prince. The King purely avail himself of his rights as a sovereign and a father which internalional law does not perfather, which international law does not permit me to oppose. I, therefore, recommend you to place the Crown Prince at the King's disposa!.

LATEST CHARGE AGAINST HARRISON.

ST. LOUIS, Sept. 28.-The Republic to morrow will print the following special from Bloomington, Ill.: Here is the house of Private Joe Fifer, in the very heart of the Illinois Republican stronghold, a handful of determined Democrats, led by a courageous Irishman, William Condon, sr., are making a stand in behalf of their countrymen who have become citizens of the United States and against the ascendency of a traducer of their race in the person of Benjamin Harrison. For the past three days the papers have been full of ugly charges against the Republican candidate for President, which are supported by incontrovertable evidence, re-enforced by the strongest affidavits from citizens of uninpeachable character. Mr. Harrison now appears before the country as the maligner of

The occasion when Harrison unbridled his wrath against the Irish was at a public meetlog held in Dunley Hall in the latter part of are hounding down their fellow countrymen and women! She never contributed as much as 50 cents to relieve the distress of the land-lord plundered Irish peasants, whom her pet ion plundered Irish peaks and the Irish peaks and

DAIRY PRODUCE.

BUTTER.-There is a marked scarcity of choice fresh dairy, owing to the efforts made by farmers to push off their old stale summer goods whilst they retain their fall make for higher prices obtained for selections.

CHEESE .- The market has shown no signs of decided improvement, although a little more buying has been noticed. The only new feature in the situation is the contracts for September and October make in the Brockville and Belle figure. Although the weather has been favorable for the fall make, it is said that production able for the fail mare, it is said that production has fallen off considerably in some sections. Freights have advanced to 27s 6d. We quote prices as follows: Finest August, 83c to 83c; finest July, 84c; fine, 74c to 8c; medium, 7c to 74c.

COUNTRY PRODUCE.

Eggs .- There is a fairly active demand for eggs now that the cooler weather has set in, and some large lots have been disposed of at 16c and smaller lots at 16kc to 17c. Receipts, although not large, are keeping up well for the season.

BEANS.—There is no particular change from Bast week and quotations range from \$2.20 to \$2.35 per bushel. HONEY.—Under a good enquiry the market is

from with sales of new strained at 12c per lb. In comb prices range from 13c to 15c per lb. HOPS.—The "boon" in hops is still on, but business is restricted by the absurdly high figures asked. We quote 17c to 25c. A lot of 10 bales of nice new hops was offered in this washed this wash but the seller could not get

market this work, but the selier could not get 20c. Old hops 60 to 10c. One lot sold at 5c. HAY.—The market is firm under a fair en-quiry, sales of choice pressed having been made at \$13.50 per ton, and we quote \$12 to \$13.50.

CATTLE WITHOUT HORNS. An interesting point referred to in the report of the British Consul at Chicago is the practice, which is growing, of dehorning cattle. Some farmers have dishorned their

whole herd. It has been calculated that 200,000 cattle and horses die each year in the United States, from horn thrusts. The advocates of the system of dehorning claim that besides lesseping this loss, and that of human life, much shed-room is saved, less hay is consumed, there is less turmoil from restive animals, and the cows, being more quiet and docile, give more milk in the case of calves the horn is extracted by a gouge or punch when two or three months old, and with fullgrown animals the horn is sawn off at the point where the matrix joins the bone horn and should be done early in the spring.
