ARCH. M. CASSILS. CHAS. STIMSON. JAS. HEDLEY.

Mercantile Summary.

WE HEAR that American manufacturers and merchants in making frantic efforts to realize are beginning to utilize the Canadian markets, which they will most likely make a kind of slaughter-house for their goods. They can afford to cut prices here as they would scarcely dare to do at home. This is one of the vicissitudes to which our traders are constantly being subjected, very much to their detriment. Whatever other effects high rates of import duties on manufactures might have they would at least check this spasmodic flooding of our market at any prices with the surplusage of goods which other larger and less accessible markets will not absorb.

REFINED petroleum is now down to 14c. in New York, or considerably less than half the Canadian wholesale price. In the Titusville Oil region the daily production for September was 31,500 barrels, the highest ever known. During September, 945,000 barrels were shipped from that territory, or nearly 80,000 barrels more than in the previous month. The stock on hand was about 1,500,000 brls., or the same as on the first of August. During October the production has fallen off rapidly, say 4,500 brls. per day, so that it is thought the October production will not exceed 27,000 brls. per day. The number of new wells is not likely to be large owing to the scarcity of money, and, besides, speculators prefer buying oil to hold for a rise to putting their money into new wells.
