

Where The Architect Stops

At no time should the professional services of the Architect cease before the interior furnishing and decorating are considered—before the house is a Home, in other words.

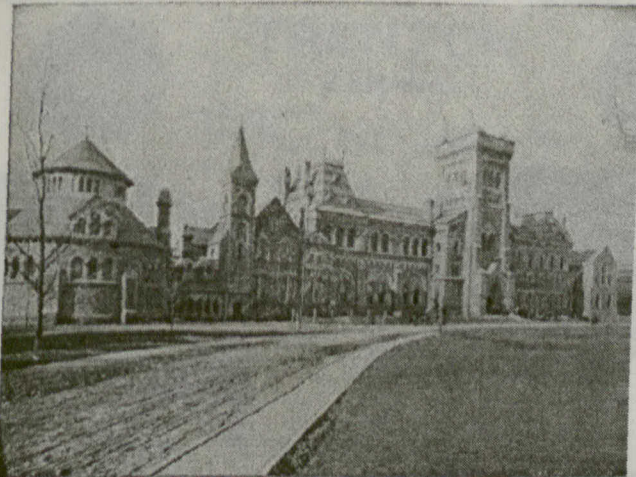

Architects whose clients commission them with the planning of the room interiors find our House Furnishing Departments of the greatest service. A trained staff is at their service to carry out their ideas with all the intelligence possible to long experience. Our stocks of Draperies, Curtains, Carpets and Furniture are among the most complete in Canada. Our prices are on our own well-known scale — PLAIN, MODERATE, ECONOMICAL PRICES.

Just at the present time we are clearing several thousand dollars worth of Drapery and Tapestry Coverings—materials from which the fickle popular demand has for the moment diverted. With taste and judgment these fabrics could easily be adapted to the best of effect. We are asking half price for them. Run in and look them over. The Drapery Department is on the 2nd floor.
