

Order Paper Questions

six-month treasury bills, namely 8.93 per cent. Principal on the loan was rolled over three times due to Jamaica's financial difficulties, but interest was kept current. On August 9, 1978, the loan was converted to a three-year loan at the Crown corporation rate of interest on three-year money, namely 8.875 per cent, with the entire principal due at term, subject to interest being paid annually and to maintenance of a standby arrangement with the IMF. Jamaica has been current with respect to interest payments since conversion of the loan into a medium-term instrument. In the past six years the Export

Development Corporation has extended six loans to Jamaica, two under government account (section 31) and the remainder under corporate account (section 29). Total value of these loans was Canadian \$8.1 million under section 31 and Canadian \$42.6 million under section 29. There are no arrears in payments to EDC. Because of commercial confidentiality, EDC cannot disclose its rates of interest. Attached is a detailed schedule of these loans indicating dates signed, amounts of financing and principal outstanding, and purpose of each loan. In so far as the Canadian International Development Agency is concerned:

(a) Development assistance grants and loans totalling approximately \$62.4 million for the purchase of services, goods and commodities by CIDA or its executing agents for delivery to Jamaica have been made since April 20, 1968.

| (b) and (c) | Amounts (\$'000) | Date | Term | Purpose | To be Repaid | Interest Rate | Payments In Arrears |
