# PROVINCES ARE RESPONSIBLE

Premier Borden Reiterates His Statements That Provincial Premiers Can Change Electoral Lists and Substitute Women's Suffrage-Local Delegation Claim That the Question Is World Wide and Therefore Commands Attention From Canadian Parliaments.

It was Wm. Munns, the official male tache to the horder of feminine polical militancy, who introduced the cal suffrageties to Rt. Hon. R. L. orden at Castle Frank yesterday, hich included such stalwarts as Dr. ugusta Stowe Gullen, hon. president, the Canadian Suffrage Association; irs. Flora McD. Denison, president, and chief spieler of the occasion; Mrs. obt. Glasgow, Dr. Alpine, Dr. Isabella 700d, Mrs. Harriet Prenter, and Mrs. colvor, who has attained fame as an dvanced suffragist in Scotland and sewhere.

Toronto University, has largely carried on the work of the national suffrage.
You will see, sir, that Canada has been working in this great international movement for women's suffrage. The policy of this organization has been to carry on its propaganda by educational methods, which have so molded public opinion in favor of its cause that the following organizatiors have passed resolutions endorsing women's suffrage:

The Dominion Alliance.
The International Brotherhood of Electrical Workers.

Issewhere.

The address, which was presented to he premier, read as follows:

The Address

Dear Sir: The present day movement for women's suffrage is neither local nor intermittent, but international in scope, well organized, and possesses a clear understanding with a definite our posses.

It demands political rights for women because it recognizes the vote as the only dignified and honorable means of securing recognition of needs and as-

There has never been a reform move-ment in the world's history that with fifty years of a record claims so many

It is interesting to know that in 1850 Ontario was among the very first to recognize women by giving them the school franchise.

Victory after victory has followed and today millions of women are free to express themselves at the polis. Now with an International Suffrage Aliliance at work there can only be one result—political equality for men and women.

women.
The International Council of Women, comprising twenty-seven national councils, and including the representation of overvictivilized sentative women of every civilized country, met in Toronto in 1909 and nanimously declared for women's suf-

and had hoped that when the organized womanmood of the Dominion asked of for the vote that right would be conceed and granted.

You, Mr. Premier, have affirmed your belief in the justice of our cause. We ask your assistance and co-operation. Cannot Be Fooled.

You are aware that no less eminent a man than Thoodore Roosevelt has deemed it expedient to put woman's suffrage as a plank in his presidential platform. By this move the women of the United States are not hoodwinked into believing that Mr. Roosevelt was always an ardent woman suffragist—the has, however, proved him to be a greater or politician than a statesman, as there are now a million and a quarter women voters in the United States, and Mr. Roosevelt thought it wise to bid for that vote.

Mr. Roosevelt thought it wise to bid for that vote.

Mr. Roosevelt thought it wise to bid for that vote.

Mr. Premier, the Canadian suffragists believe that the leader in this great be

The portion of sunlight active in producing chlorophyll in plants proves to be the ultra-violet rays. The evidence is claimed by Prof. J. Stoklasa of Prague. Peas, maize, oats and barley output for the first three or four years. posed to the sun's light, and the thir part was placed in the rays of a me-cury vapor lamp. The dark room po-tion remained white, soon withere and died. The plants in the sunshing and died. The plants in the sunshine gained some chlorophyll, tho always remaining more yellow than normally grown specimens, but the third in the ultra-violet rays of the lamp quickly became intensely green, retaining the color long after being cut and placed in water. Greenhouse plants were more sensitive to the ultra-violet light than those of the open air.

The Australian opal production of all descriptions is now seventy-five per cent. less than has been known at any other time during the last twenty years, and black opal in particular has temporarily ceased to be produced. It is hoped, however, that new exploration work will result in fresh finds.

having to be harvested at the same period, and overcrowding the smaller canneries. "They have lost thirty days of the canning season, and naturally their output will not be so great as if normal weather conditions had prevailed." was his statement. Should varm weather continue late in the fall here is some possibility that canned matoes will be comparatively cheap, virg to the unusually large except the liver, clears the swint of the unusually large except the liver, clears the swint of the unusually large except the liver, clears the swint of the unusually large except the liver, clears the swint of the unusually large except the liver, clears the swint of the unusually large except the liver of the unusually large

Large Quantities, But
Canned Goods Will
Continue High.

Business at the Toronto Fruit Market yesterday continued easy, and buying was only fairly brisk. Peaches and grapes continued easy, and buying was only fairly brisk. Peaches and grapes continued to arrive in large quantities, pears are almost over. Plums and the better grades of apples are selling well, and bringing fairly good prices. Folowing are some of the prices: Peaches, 40c to 56c, with better qualities selling at 70c to 36c; grapes from 20c to 25c; good fall apples at \$2.50 per barrel, and tomatoes from 20c to 25c a basket; plums are selling around 40c.

Even with the splendid crop of peaches and tomatoes, the prices of harvest the crop on the American are substituted the coming winter. H. D. Buy, of the Eby Bisin Co., explaining the structure of the prices of peaches and tomatoes, the prices of harvest the crop on the American as the cold weather during August kept through the coming winter. H. D. Buy, of the Eby Bisin Co., explaining the situation to the press, pointed out that the cold weather during August kept through the continue high through the continue high through the continue high through the continue high through the peach and tomatoes are selling and the supply of baskets is too small, growers in the fruit belt on the prices of canned goods are likely to continue high through the peach and tomatoes are selling in the stores on the American side at forty cents a bask the tomato crop over a month late, resulting in the peach and tomatoe crop on the American side at forty cents a bask the tomato crop over a month late, resulting in the peach and tomato crop over a month late, resulting in the peach and tomato crop over a month late, resulting in the peach and tomato crop over a month late, resulting in the peach and tomato crop over a month late, resulting in the peach and tomato crop over a month late, resulting in the peach and tomato crop over a month late, resulting their peaches

Miss H. L.: If you only knew what was in the cheap, greasy cold creams you have been smearing on your face, you would never use them again, as they are really harmful. Never use anything but a greaseless cream if you don't want hair on your face. At a small expense you can prepare an excellent complexion cream-jelly by stirring together and allowing to stand over night two teaspoonfuls glycerine, one cunce almozoin and one-nall pint cold water. Use this regularly and it will clear up your complexion wonderfully by removing all dirt and oil. It will also remove quickly those blackheads and other effects of hot weather such as freckles, tan and roughness of the skin of which you speak. This is the only reliable cream I have ever found for removing wrinkles without leaving the skin rough and flabby after massaging and for reducing the size of large, dirt-collecting pores.
