Harbor Embankment at Port Weller Lined With Waste Rock.

Special to The Toronto World.

ST. CATHARINES, Sept. 27.—Revelation of progressing construction on the Welland Sh p Canal was made today to nearly 200 excursionists, who took opportunity furnished by the engineers of the big work.

Four cars took the excursionists from St. Catharines to Port Weller and over the government railway along the big ditch, the work on it being done since turning the first sod three years ago.

This railways is one of the features of

ditch, the work on it being uone since turning the lirst sod three years ago.

This railways is one of the features of the work extending from shorelone of Lake Ontario to the rock crising pant north of Thorold, a distance of nearly 8 miles. It is doubled tracked full length, equipped with 60-ib, rails with complete interlocking and block signal system and modern te ephony train despatching system, built by the department of railways and canais for use of contractors in hauling excavated materials from sections one, two and three to the harbor embankment at the outlet of the canal at Port wair.

Busiest Road in Canada

This road is ballasted with stone, and tho it is probably the burns road in Canada, 14.006 cars being handled daily, no accident of any consequence has yet occurred on it. Cars in their daily dumping operations have already dumped into the lake a large quantity of the 40.000,000 cubic feet of earth and 6.000,000 cubic feet of earth and 6.000,000 cubic feet of earth and some waste have been built up trom the bottom of Late Ontario, extending one and a half miles out from shore on the west side of Port Weiler and one mile on the east side,

Full length has not yet been reached on the west side, within which is to be now Port Weiler harbor. Dredges and rock drills are still working. Making it a uniform depth of thrty feet. The component of the harbor is already in position, and the outsides of the breakwater will be lined with rock waste.

So substantial is the west side of the breakwater made from the dumping that the excursion train this afternoon ran out a mile and a quarter on it from the shore line.

Several miles of Section 2 are now beneated up to full beitted and the section.

a mile and a quarter on it from the shore line.

Several miles of Section 2 are now banked up to full height, and the excursionists saw the finishing operations in progress. There is yet a great deal of work to be done on the three sections; and also on No. 4, before the old channel is joined at Allanburgh. Widening and deepening of the old channel from this point to Lake Erie has not yet been started. Construction has proceeded to an appreciable degree, however, on all seven locks, and, altho all contractors are suffering from a shortage of help, and the work cannot be completed within five years, as estimated, yet the progress is considered marvelous.

One portion of Lock 1 is finished to its full height. Like the others, it is of solid concrete, each lock, exclusive of huge concrete approaches, requiring 200,000 cubic feet of concrete in construction. This provides a useable length for oceangoing ships, 800 feet in length. The lock itself is really 35 feet longer, providing for swinging and operation of a huge 1100-ton single leaf steel gate. IRS. ANNIE GRANT DIED

FROM NATURAL CAUSES Verdict Returned by Jury at Inquest on Body of Orangeville Woman.

That the death of Mrs. Annie Grant of Orangeville, who died suddenly in St. Michael's Hespital on September 19, was from natural causes, was the finding of the jury under Coroner J. Loudon at the inquest at the morgue last night. Mrs. Grant was admitted to the hospital on September 9, suffering from a fractured hip sustained as she was in the act of alighting from a King street car at McGee and Queen streets on that day. Her condition was very favorable at the hospital, but on the 19th she suddenly became violently ill and died within 15 minutes.

"Providence has given
us the brains to
devise means to compensate Nature for
our ill-treatment of
her. . . The means
at hand come from
natural sources, and
we have them embodied in such splendid combination as
Dr. Cassell's Instant

Dr. Cassell's

(MSIANT Dr. Carcell's Instant Relief is the communion perparation to Dr. Cassell's Tables.

Liver Troubles, Sick Headache, and Habitual Constipation.

Liver troubles and habitual constipation can be cured-but not by cathartic or purgative medicines. The only possible way is to help your system to cure itself; and that is what Dr. Cassell's Instant Relief so surely does. It is not cathartic, it is not violent, it is quite different to the coarse purgative preparations in common use. These only irritate and weaken; Dr. Cassell's Instant Relief tones and strengthens the liver and bowels, and so restores their power to do nature's work in nature's way. Take Dr. Cassell's Instant Relief for constipation, biliousness,

liver troubles, sick headache, flatulence, acidity, heartburn, and impure blood. Ask your Druggist for Dr. Cassell's Instant Relief and take no substitute. Price 50 cents from all Druggists and Storekeepers, or direct from the sole agents for Canada, Harold F. Ritchie and Co., Ltd., 10. McCaul-street, Toronto. War Tax, 2 cents extra.
