

FEBRUARY.

The commencement of this month will be marked with unusually cold weather. On the 3d at midnight the glass will fall to 31 degrees below zero. On the 5th the weather will moderate, and a heavy fall of snow will take place. Until the 10th the weather will be soft, cloudy and calm, with occasional falls of snow; after which it will again clear up into a severe frost, which will last with only slight intermissions of moderate weather, until the 21st, when two days of very soft weather will occur, with a slight shower of rain. On the 23d the frost will again set in, and last as before with short intermissions, to the end of the month. The weather during the entire of this month, with the exceptions mentioned, will be unprecedentedly cold.
