BRIDGING AN ALGERIAN CHASM

A marvellous feat of engineering skill performed by French engineers at Constantine, French Africa. The bridge is suspended at a height of more than 300 feet over the Rhummel river and runs between sheer precipices of chalk cliffs on each side. Owing to the difficulty of approaching the work this is regarded as the greatest piece of engineering work yet completed. It is regarded as a much greater achievement than the Niagara suspension bridge, because of the fact that it has just been recently opened for travel and joins the French-Arab town of Constantine with the immense infirmary on the other side. The bridge was designed and built by Mr. Anonin, of the Chateau de la Roche, France, under the supervision of Mr. Boismier, French civil engineer.

GIVES LECTURE ON CHRISTIAN SCIENCE

Bliss Knapp Heard By Large Audience Yesterday Afternoon

Bliss Knapp, C. S. B., of Boston, delivered a very interesting lecture on Christian Science to a large audience in the Opera House yesterday afternoon. Mr. Knapp is a member of the board of lecturers of the Mother Church, the First Church of Christ, Scientist, in Boston. He said in part:—

It is recorded that Jesus could "do no thing of himself, but what he seeth the Father do." The ability of the gentle Nazarine to obliterate disease and sin was, therefore, the result of what he knew about God, and surely he knew more about God than any other man who ever trod the globe. The ability of his disciples to perpetuate Christian healing was also the result of what Jesus taught them about God. Even so, the ability of a Christian Scientist to heal the sick and sinning through prayer is wholly due to a better understanding of God, who is the divine Principle of man's existence. This is in agreement with the Scriptural command to "Acquaint now thyself with him, and he will peace."

GIRLS AS TEST, LIVE ON SEVEN CENTS A DAY

For the week ending at noon on Sunday, Dec. 3, several young women, pupils of the senior class of the Cincinnati Kindergarten Training school, conducted an experiment in dieting, the results of which indicate that it is quite possible for a girl to live on seven cents a day, with preparation, to secure good food at an average cost of twelve cents a day, says a special to the New York World. If she could afford this she can get along nicely on as little as seven cents a day, which is what the prospective teachers accomplished in their trial.

In order to carry out the test thoroughly the girls were given a model diet which was fitted up by the school board. They did their own housekeeping, marketed and prepared their meals, besides doing their regular class and special work.

Here is the seven-cent menu:
Breakfast—Cornmeal mush and milk, brown bread or toast, coffee or cocoa.
Luncheon—peanut sandwiches, bread and jelly, spruce, fruit.
Dinner—Split-pea soup, cream codfish on toast, apple dumplings with sauce, tea.

It is expected that the results of the experiment will be applied when a model working-girl's flat is established in connection with the Schuylkill Model Home.

Hon. Mr. Pelletier Says Borden Cabinet is Agreed That The Ten Ships Planned by Laurier Shall Not Be Built

Quebec, Dec. 10.—Hon. L. P. Pelletier, postmaster of Canada was the guest of honor at a banquet given at the Chateau Frontenac, Quebec, on Saturday. Hon. Thomas Chapais presided and more than 400 were present, among them being several cabinet ministers. A unique feature of the decorations was the representation of an immense letter, addressed to the builders of the Tower of Babel, and declared that their labors could not be acceptable to Christian civilization. He further said that no city charter could be satisfactory unless it was based on the Bible, whereas in the draft of the proposed charter there was no mention whatever of God. He also said the board of trade met last week and recommended that technical education be given in night schools. But they forgot one thing. They did not recommend that the Bible be taught in the schools.

REV. MR. CODY ON THE CITY CHARTER

In his sermon in St. James' church last night, Rev. H. A. Cody, the pastor, likened the framers of the new city charter to the builders of the Tower of Babel, and declared that their labors could not be acceptable to Christian civilization. He further said that no city charter could be satisfactory unless it was based on the Bible, whereas in the draft of the proposed charter there was no mention whatever of God. He also said the board of trade met last week and recommended that technical education be given in night schools. But they forgot one thing. They did not recommend that the Bible be taught in the schools.

J. A. Belyea, chairman of the charter committee, said that the framing of the charter was a matter of politics, law and business and not of religion.

Referring to the naval question, Hon. Mr. Pelletier said that Mr. Borden's announcement had been made loyally and

FATHER McLAUGHLIN'S ADDRESS BEFORE C.M.B.A.

The third of the series of lectures under the auspices of the C. M. B. A. was given in their hall, Union street, last evening, by Father McLaughlin, of Milltown (N.B.), on Church and Liberty. The speaker began by referring to the marvellous progress Canada had made from the day Champlain laid the foundations of the quaint city, Quebec, till the present. Canada's future prosperity, he said, was assured so long as Christian men guided by Christian principles directed the ship of state, and they would find in the church their strongest ally for the maintenance of law and order. Liberty was the boast and master passion of age but liberty was not license nor freedom from all restraint but rather the fullest possible development of one's faculties under the law of divinely constituted authority. The lecturer then spoke of the state of the world at the dawn of the Christian era and showed how the church had gradually lessened the huge mass of degraded humanity and proclaimed the liberty of the individual and society. She fought for the liberty of the slave and rested not until it was emancipated.

She proclaimed the dignity of woman and her equality with man in the domestic circle. She offered to the world a system of government fashioned after her own policy which was gradually adopted by all European countries. In crowning her sovereign she inspired an oath upon them that they would rule with equality and justice ever endeavored, thereby, to protect the liberties of the ruled. He showed how through the intervention of the church the Magna Charta was won from King John, and it had become the basic principle of constitutional government all over the world.

The church was rearing up in this land a healthy, vigorous and Christian species of Canadian citizens who joined with their fellow citizens of all classes and creeds in the prayer that should daily ascend to the throne of the Most High, "God Save the King, God Bless and Prosper Our Happy Land."

He hoped that Canadians would emulate the example of their southern friends who had put an end to internal strife by erecting on the summit of the Andes a statue of the Prince of Peace, and would cause to be erected on the Plains of Abraham, a statue of the Angel of Peace, which would proclaim to all the world, more loudly than words, that racial strife and religious feuds would no longer be heard throughout the land, and that here peace hath her victories no less renowned than war.

Father McLaughlin made an excellent impression and at the close, on motion of Joseph Harrington seconded by Thomas Gorman, he was accorded a hearty vote of thanks. The chair was occupied by C. P. O'Neill who announced that the next lecture would be delivered by H. O. McInerney, on Sunday evening, Dec. 17. He will talk as his subject, Henry Grattan.
