wonderful work . The Germans may get across the Channel , which i greatly doubt, but they will certainly get a very warm reception, if they do .

I should think the Prime Minister of this country should be thoroughly ashamed of himself with the meager efforts he has made, and when he found himself faced with the real issue he immediately went up in the air, and even now is not putting forth the effort which one should in the face of all the circumstances.

I might say , in passing, that I have received rather encouraging letters, one from Air Commodore Cuffee, in which he tells me that he is taking up the Barton case with the Sr. Royal Air Force of the british mission. This young boy is a real wonder. He is only 22. He went over at his own expense in 1936 , and he addressed a meeting here on Monday , which far excelled anything that I have heard, either from England or over the Air, or in fact any place.

May I on his behalf and on his poor mother's behalf, express our grateful appreciation for your letter, and for the efforts which I know you will endeavour to make.

Yours truly,

(J.A. McGibbon ).
