IV.—Finland: its Forests and Forest Management. Price 6s 6d.

In this volume is supplied information in regard to the lakes and rivers of Finland, known as The Land of a Thousand Lakes, and as The Last-born Daughter of the Sea; in regard to its physical geography, including notices of the contour of the country, its geological formations and indications of glacial action, its flora, fauna, and climate; and in regard to its forest economy, embracing a discussion of the advantages and disadvantages of Svedjande, the Sartage of France, and the Koomaree of India; and details of the development of Modern Forest Economy in Finland, with notices of its School of Forestry, of its forests and forest trees, of the disposal of its forest products, and of its legislation and literature in forestry are given.

EXTRACT FROM PREFACE.—'I happened to spend the summer of 1879 in St. Petersburg, ministering in the British and American Chapel in that city, while the pastor sought relaxation for a few months at home. I was for years the minister of the congregation worshipping there, and I had subsequently repeatedly spent the summer among them in similar circumstances. I was at the time studying the Forestry of Europe; and I availed myself of opportunities afforded by my journey thither through Norway, Sweden, and Finland, by my stay in Russia, and by my return through Germany and France, to collect information bearing upon the enquiries in which I was engaged. On my return to Scotland I contributed to the Journal of Forestry a series of papers which were afterwards reprinted under the title Glances at the Forests of Northern Europe. In the preface to this pamphlet I stated that in Denmark may be studied the remains of forests in pre-historic times; in Norway, luxuriant forests managed by each proprietor as seemeth good in his own eyes; in Swoden, sustained systematic endeavours to regulate the management of forests in accordance with the latest deliverances of modern science; in Finland, Sartage disappearing before the most advanced forest economy of the day; and in Russia, Jardinage in the north, merging into more scientific management in Central Russia, and Reboisement in the south. This volume is a study of information which I then collected, together with information which I previously possessed, or have subsequently obtained, in regard to the Forests and Forestry of Finland.

Translation of Extracts from Letters from Dr. A. Blomqvist, Director of the Finnish National School of Forestry at Evois:—'On my return from Salmos three weeks ago I had the great pleasure to receive your volume on the Forests and Forest Management in Finland. I return
