Highland View Dairy, Amherst, N. S.

MARKET REVIEW AND FORECAST

TORONTO, September 27.—A big factor militating against the easy movement of trade, is the high rate of exchange between the American continent and Great Britain. Very few seem to have any clear idea of just how this adverse rate of exchange came into effect, and the farm and dairy market must not care to give a complete explanation in these columns. Briefly, however, it is this: Due to the demand of Great Britain and other European coun-

tries for food and war munitions, our exports there have been very large. Exports in international trade must be paid for either in goods or in gold. British goods are sold in the United States in part to the fact that her factories are busy on war munitions but probably more so to the fact that the United States has the United States. Consequently she has to ship gold. Financiers on this side have to furnish the gold. The value of gold would depreciate the value of a dollar and further imports were not looking with favor, consequently with payment exceedingly difficult. English money, which simply means an English promise to pay, got around the difficulty by the United States making a great loan to Great Britain, which would serve to balance the trade, and which would also be used in payment for British purchases in America.

In discussing the probable effect of the loan on the marketing of the wheat crop, the Canadian Press expressed the fear that the United States financiers might insist as a condition of the loan that Great Britain relieve the United States of her surplus wheat crop. If such a condition were insisted upon, there would be only price reduction in the United States. Growers to remove the protective tariff on wheat coming into Canada and the automatically open to United States market to Canadian wheat and thus give to Canadian farmers the full benefit of the loan.

A review of trade conditions during the week shows some improvement in wholesale circles as fall orders have been coming in more freely. In the produce trade fresh grains fairly steady, mill feed weaker, hay and straw steady. Live stock stronger, dairy produce firm to stronger and live stock and lower level.

WHEAT.
Wheat has dropped a few cents, transportation difficulties and the rate of exchange both militating against quotations. Another factor counting strongly against wheat is the fact that the Government has increased in the crop of the world 50,000,000 bushels. Government reports so far have been conservative. The market estimates and these too have tended to depress the market. These official reports, however, are very conservative and optimistic.
