

MARKET REVIEW AND FORECAST

TORONTO, July 1.—The unseasonably cold spell retarded the somewhat limited vegetable supply. The week's profit visited some districts, but the injury done to growing crops was not serious. Accounts from the country continue favorable. Pastureage is excellent and the best milk largely from that country and the bean crop is looking well as farms so that most have done little damage so far. One farm in the area is reported to be growing 100 acres of beans. It is not turning out as well as was expected a few weeks ago. A considerable acreage of both clover and alfalfa has already been cut for hay. This is the fodder question for the present is largely settled. Pig feed is the form of grain mainly in demand.

Quotations on cattle are declining, but the beef market is firm. The egg situation during the week has been considerably improved, due to Western eggs coming on the market, but quotations remain unchanged; butter is quiet and cheese is fairly active.

WHEAT.

There has been no wheat moving to Ontario points during the past week because of the excessive demand. It is claimed, however, that there is ample feed for domestic consumption. Fixed prices are as follows:

Manitoba Wheat—In store, Port W.
