

## A Remarkable Invention FOR THE CULTURE OF HAIR.

THE EVANS VACUUM CAP is a practical invention constructed on scientific and hygienic principles, by the simple means of which a free and normal circulation is restored throughout the scalp. The minute blood vessels are gently stimulated to activity, thus allowing the food supply which can only be derived from the blood, to be carried to the hair roots, the effects of which are quickly seen in a healthy, vigorous growth of hair. There is no rubbing, and as no drugs or chemicals of whatsoever kind are employed, there is nothing to cause irritation. It is only necessary to wear the Cap three or four minutes daily.

### 60 DAYS' FREE TRIAL! The Company's Guarantee.

An EVANS VACUUM CAP will be sent you for sixty days' free trial. If you do not see a gradual development of a new growth of hair, and are not convinced that the Cap will completely restore your hair, you are at liberty to return the Cap, with no expense whatever to yourself. It is requested, as an evidence of good faith, that the price of the Cap be deposited with the Chancery Lane Saf. Deposit Company of London, the largest financial and business institution of the kind in the world, who will issue a receipt guaranteeing that the money will be returned in full, on demand, without questions or comment, at any time during the trial period.

The eminent Dr. I. N. LOVE, in his address to the Medical Board on the subject of Alopecia (loss of hair) stated that if a means could be devised to bring nutrition to the hair follicles (hair roots), without resorting to any irritating process, the problem of hair growth would be solved. Later on, when the EVANS VACUUM CAP was submitted to him for inspection, he remarked that the Cap would fulfill and confirm in practice the observations he had previously made before the Medical Board.

Dr. W. MOORE, referring to the invention, says that the principle upon which the Evans Vacuum Cap is founded is absolutely correct and indisputable.

An illustrated and descriptive book of the Evans Vacuum Cap will be sent, post free, on application.

THE SECRETARY, EVANS VACUUM CAP CO., LTD.,  
REGENT HOUSE, Regent St., Lond n, Eng.

## Burnsides Ayrshires

Imported and Canadian-bred. Prizewinners at all the leading shows. I hold the award of merit given by the Bd. of Dir. of World's Fair, St. Louis, to the breeder of largest number of prizewinning Ayrshires at said Exposition. Females of all ages for sale, imported and Canadian-bred.

R. R. NESS, JR., HOWICK, QUE., P.O. AND STATION.

43 head of big, deep-flanked, heavy-producing Holsteins, many of them milking from 50 to 60 lbs a day on grass. Young stock of both sexes for sale. A straight, smooth lot.

G. MACINTYRE, Renfrew P. O. and St.

## Springhill Ayrshires.

Over 25 heifers from 6 months to 3 years of age. Nearly all of them imported, the balance bred from imported stock. A high-class lot of show stuff. A few older ones imported and Canadian-bred. Three bull calves, 1 of them imported in dam, the others bred from imported Cross of Knockdon. Anything in the herd is for sale.

Robt. Hunter & Sons, Maxville, Ont.

**Ayrshire Bulls** One last September and a few March and April calves by the champion Douglasdale (imp.) W. W. BALLANTYNE, Neidpath Farm, Stratford, Ont. Long-distance 'phone.

**SPRINGBROOK AYRSHIRES** gave an average of 7,000 lbs. of milk, testing 3.4 per cent. butter-fat in 1905. A few bull calves for sale. Prices quoted for females. W. F. STEPHEN, Fox 163, Huntingdon, Que.

**Ingleside Ayrshires** won more prizes in 1904 than all other competitors combined. Young stock of either sex for sale. H. C. HAMILL, Islay P. O., Ont. Fenelon Falls or Lorneville Stn.

**Wardend Ayrshires** We are offering young bulls from 1 to 2 years old; also a choice lot of spring calves from deep milking dams. Sired by White Prince of Menie No 1885; bred by A. Hume Menie, F. W. TAYLOR, Wellman's Corners, Hord's Stn. G. T. R.

**Glenhurst Ayrshires** Oldest established herd in Ontario. Imp. and Canadian-bred. Average B. F. test for the whole herd 42; milk yield, 40 to 60 lbs. a day. For sale: females of all ages, and several young bulls; all by Imp. sire and some out of Imp. dams. James Benning, Williamstown P. O., Lancaster Stn.

**Ayrshires** 3 prizewinning bulls fit for service at reasonable prices also younger ones for quick buyers. N. DYMENT, Hickory Hill Stock Farm, Dundas Stn. and Tel. Clappison, Ont.

## QUESTIONS AND ANSWERS. Veterinary.

### UNPLEASANT HABIT.

Four-year-old mare has for some time been in the habit of throwing her head up and down when driving, and lately I have noticed her doing the same when in the stable.

A. T. S.

Ans.—This is a habit, probably contracted on account of irritation in the mouth by the bit. Habits of this nature are very hard to check. Drive her with a plain snaffle bit covered with leather or rubber, and use the lines very gently in order not to worry her mouth. If possible, give her a box stall when in the stable, and, of course, allow her to go untied in the stall. There is no disease. It is simply a very unpleasant habit.

V.

### FISTULA IN TEAT.

There is an opening in the side of teat in young cow. When milking, the milk flows from this opening and also from normal opening.

W. M.

Ans.—This is a fistula. It will be better not to treat until she is dry before next calving. Then throw and secure her, scarify the edges of the fistula until they bleed, then stitch the wound with carbolic silk sutures, and then dress, three times daily, with a five-per cent. solution of carbolic acid until healed. Cut the stitches out in ten days. After this treatment, the teat will be in a normal condition after next calving.

V.

### PERIODIC OPHTHALMIA.

Four-year-old colt has repeated trouble with his eyes, sometimes one and sometimes the other. He appears to be constantly getting something into his eyes, until he is nearly blind in both.

J. S. K.

Ans.—This is a constitutional disease called periodic ophthalmia. It is not due to a foreign body in the eye. The attacks cannot be prevented, and he will eventually be blind from cataract. All that can be done is to treat each attack as follows: Give a slight purgative, as 6 drams aloes and 2 drams ginger. Keep in a partially-darkened stall, excluded from sunlight and drafts. Bathe the eyes well with warm water three times daily, and, after bathing, put into the eyes a few drops of the following lotion: Sulphate of zinc, 10 grains; fluid extract of belladonna, 20 drops; distilled water, 2 ounces. This is a hereditary disease, and it is probable some one of this colt's ancestors suffered from cataract.

V.

### VICIOUS COLTS.

I have a pair of colts, three and four years old, full brother and sister. The four-year-old was handled by a professional, and I handled the three-year-old myself. Both have the habit of rearing so that you would think they would fall backwards. They rear when starting and when anything frightens them.

C. H. O.

Ans.—This is an acquired habit, and in many cases the predisposition is hereditary, as it evidently is in this case. Drive with a plain snaffle bit covered with leather and be very gentle with the lines in order not to irritate the mouth. Allow them to start off with a slack rein, and, if possible, avoid objects that frighten them. If necessary, use an overdraw check so that they are unable to rear, but we do not advise the use of a tight overdraw unless necessary for safety. It is probable that careful, intelligent, easy handling will eventually get them over the vice.

V.

### NASAL IRRITATION.

When my mare commences to eat hay she makes a peculiar noise through her nostrils, and is all the time blowing her nose, as though the dust affects her.

R. T.

Ans.—If the hay is dusty, the trouble probably is an irritation caused by the dust, and while it is unwise to feed dusty hay under any circumstances, the nasal irritation can be prevented by damping the hay before feeding. If the sneezing is not caused by the dust, there is probably some growth in the nostrils that causes the trouble. In some cases, such growths can be removed, while in others they are so far back they cannot be seen. I would advise you to get your veterinarian to examine this mare, and if he can detect any foreign growth he will remove it.

V.

## Does Your FOOD Digest Well?

When the food is imperfectly digested the full benefit is not derived from it by the body and the purpose of eating is defeated; no matter how good the food, or how carefully adapted to the wants of the body it may be. Thus the dyspeptic often becomes thin, weak and debilitated, energy is lacking, brightness, snap and vim are lost, and in their place come dullness, lost appetite, depression and languor. It takes so great knowledge to know when one has indigestion, some of the following symptoms generally exist, viz.: constipation, sour stomach, variable appetite, headache, heartburn, gas in the stomach, etc.

The great point is to cure it, to get back bounding health and vigor.

## BURDOCK BLOOD BITTERS

is constantly effecting cures of dyspepsia because it acts in a natural yet effective way upon all the organs involved in the process of digestion, removing all clogging impurities and making easy the work of digestion and assimilation.

Mr. R. G. Harvey, Ameliasburg, Ont., writes: "I have been troubled with dyspepsia for several years and after using three bottles of Burdock Blood Bitters I was completely cured. I cannot praise B.B.B. enough for what it has done for me. I have not had a sign of dyspepsia since."

Do not accept a substitute for B.B.B. There is nothing "just as good."

## The Waters Place, Herts, England

REGISTERED

## HAMPSHIRE DOWN FLOCK

(ESTABLISHED IN 1874).

the property of Mr. T. F. Buxton, who is giving up ram breeding undoubtedly one of the best of the breed in existence, and possessing a brilliant show-yard record. Will be sold by auction on
