

WE WANT TO TELL YOU HOW YOUR COMMUNITY CAN OPERATE A SUCCESSFUL TELEPHONE SYSTEM OF ITS OWN

The Northern Electric is the instrument on the wall of nine out of every ten telephone users in Canada.

THE number of rural telephone lines started during the last year has been greater than ever before in the history of Canada. If, indeed, it has not been started already, your own community is bound to have a telephone system, sooner or later. You would have such a system at once, if you and your neighbors only realized how quickly, easily and inexpensively it could be put into operation. You, yourself, can start this system going right away; with the help we offer, you can interest your friends and neighbors and, among you, can organize your own company, erect your own line, install your own instruments, and operate your own self-maintaining telephone system, just as successfully as the largest telephone exchange is operated in the largest city on the continent.

This Bound Volume of 100 Illustrated Pages is FREE

NEVER, since farmers first started installing their own telephone instruments, has there been produced so comprehensive a volume of instructions as our book "How to Build Rural Telephone Lines." This book, printed on good paper, illustrated with photographs and diagrams and bound in stiff, cloth covers, is an invaluable text-book on the subject of constructing telephone lines in the rural districts. Written in plain language by expert telephone engineers, it has been a very costly book to produce. It is really almost too valuable to give away free; we could not afford to distribute it haphazard. However, we have one copy for you.

BUT We Send It Only When You Ask For It

"How to Build Rural Telephone Lines" tells about what other rural telephone companies have done, about company organization, about constructing the line, about installing the instruments, about the materials required, about the instruments themselves, and also even gives the law in regard to wires crossing railways, etc. Chapter after chapter, it goes into each item in detail. Nowhere else are the facts so concisely set forth as they are in this book.

YOU don't need to know anything about company organization to start a company among your own friends and neighbors. Our book tells all about both mutual and stock companies and shows you, step by step, just exactly how to go about the matter. It shows you how the procedure differs in the various provinces, what the different governments demand of you and what they will do to help you.

You Can Build Every Foot of Your Own Line

NO expert lineman or superintendent of telephone construction is necessary to build the efficient line that you can put up yourself by merely following the detailed instructions given in this book. Any man who can read and who will follow directions with ordinary sense can build his own telephone line. With the instructions that you can give your neighbors after you have read this book, they can erect every pole, place every cross-arm, string every foot of wire and install every instrument. You can easily realize how this means economical construction.
