**BIG CONTRACT GIVEN TO CANADA.**

New York News Record says: Military contracts is 12,000,000 pairs of woolen gloves to be worn by the United States army and navy, and possibly by the soldiers and sailors of our allies have slipped away from fabric glove manufacturers in the United States and will be filled by Canadian firms.

Glove men this side of the border, who have been figuring on securing a part of these big contracts for many weeks past, are inclined to be reticent about the loss of this great amount of business, but admit it is one misfortune of war and a great American wool famine.

**FEAT OF ITALIAN AVIATOR**

Carrying twelve passengers in a Capromi triplane. Lieut. Emilio Resnati, the Italian army aviator, attained an altitude of 17,000 feet the other day in Virginia. This was 1,000 feet higher than the previous American record with a single passenger, made by Victor Carleton, an American aviator who was killed several months ago in the fall of his machine and was regarded as a remarkable performance.

New York Maritime Register: A four-masted schooner left Boston recently for a port in the South to load a full cargo of Virginia smoking and chewing tobacco, which she will deliver at French port. This cargo is believed to be the first of its kind ever sent across the Atlantic. The tobacco is intended for the use of the American fighters in France.

**WHAT IS THE LONGEST POEM**

Which is the longest poem in the world? One generally regards "Paradise Lost" as long and Thompson's "Seasons" and Cowper's "Task." But are short compared with Spencer's "Faerie Queen," which is easily the longest poem in existence, even as it stands and had he attained his object and reached the twenty-fourth book, no other poet would have been in it.

It is only a quarter of the original plan yet it is as long as the Iliad, the Odyssey and the Eneid put together twice as long as Dante's "Divina Commedia," and three times as long as "Paradise Lost" and "Paradise Regained" in one.

The longest novel in the world belongs to Japan. Its author is King Te Bakin.

It was commenced in 1852 and published volume by volume as it came out over a period of fifty years. There are 109 volumes, 104,000 pages, 3,180,000 lines and about 38,000,000 words. A complete copy weighs 180lb.

Shelburne Gazette: Previous to being struck by the train a week ago last Saturday, Mrs. Olive DeChamp was very deaf, in fact it was almost impossible to make her hear any sound at all. Since the accident, strange to say, her hearing has improved considerably.

6,000 attended the first day of the Lunenburg County exhibition on Wednesday at Bridgetown. 260 autos were on the grounds at one time and the fair was the best ever held in the County.

**THE "MELLOR"**

The following note of the "Mellor Glove" may be interesting to Red Cross workers in Annapolis and throughout Nova Scotia—

Among the ardent workers in the British Red Cross Society of Manchester England is Miss M. L. Mellor, (a first cousin of the Rev. T. C. Mellor, Rector of St. Luke's church, Annapolis Royal) a lady who has given much time and thought to the sailors and mine sweepers and others engaged on war ships guarding and protecting our shores from invasions. Her patriotism and love of country led her to invent a glove, different entirely from anything else used by men in the Watch Dogs of the Empire.

The following different classes of sailor men have asked for and received gloves of the Mellor pattern—mine sweepers, mine layers, oil tank crews, engineers on Government colliers, ammunition ships crews, destroyers crews, battleships crews, and other men who do rough work with machinery. One machinist said, "This is about the only sensible protection for us chaps I have ever seen."

A Red Cross worker said, "I can only say that the gloves have proved the most popular of the many gifts which have been sent us for distribution."

Thousands of pairs have already been sent for the comfort of the sailors. There is a growing demand for them, by the use of them many men are saved from torn hands, blood poisoning and even frost bite. Ordinary gloves though welcome for officers and for men on look-out duty, will not stand sea wear and tear. A Mellor glove being reversible, will stand hard sea service for months.

Urgent appeals are being made for more and yet more for sailor made "Mellors." It would not be surprising if the appeal comes to the various branches of the Red Cross Society throughout Canada.

**4000 TURKS CAPTURED**

On the northern front in Russia, in the region of Riga, the Russians are keeping up their offensive against the Germans. Following up their attacks of Sunday in which gains of from 800 to 1000 yards were made the Russians again have surged forward and beaten back the enemy for a distance of one mile south of the Kronenberg-Spital-Groundull sector. Quiet still prevails on the eastern front farther south and in Galacia and Roumania. In Mesopotamia the British victory over the Turks at Ramed, west of Bagdad, was greater than at first reported. In addition to capturing the town, nearly 4000 Turks were made prisoners and large number of guns and quantities of war stores captured. Besides heavy casualties were inflicted on the Ottomans. British and French airmen are continuing their raids against German positions behind the lines and the French airmen are carrying on further reprisals against German cities and towns for the bombardment of open French settlements. Large quantities of explosives have been dropped by French airmen on Struttart, Frankfurt on Main, Coblenz and Treves while in conjunction with British aviators, railway stations, airdromes, munition depots and military encampments have been effectively bombed.

**NEW HIGHWAY ACT IN NOVA SCOTIA IN FORCE.**

HALIFAX, Sept. 28.—A Royal Gazette extra, issued today contains a proclamation bringing section of the new provincial roads act into effect on October 1. The proclamation says: "The provisions of this act relating to the collection of the provincial highway fund, the organization of the board, the power to make any appointment rules or regulations, to give notices, prescribe forms or do any other thing deemed necessary for the bringing of the act into operation, shall become effective on from and after a day to be named in a proclamation by the governor-in-council; such sections and acts shall respectively become and remain in force or be repealed according to the tenor of such proclamation; the remaining provisions of this act shall become effective on from and after a day to be named in any subsequent proclamation by the governor-in-council."

**FIRST TRAIN OVER QUEBEC BRIDGE ON FRIDAY, OCT. 19.**

MONTREAL, Sept' 30.—The first train will cross the new Quebec bridge on Oct. 19 so it is announced here. It is understood that the directors of the Dominion Bridge Company with a number of guests, will attend the opening ceremony.

**ENORMOUS WASTAGE OF FOOD IN CANADA'S SUCCESS.**

The enormous wastage in food throughout the Dominion is indicated by statistics compiled by the food controller. It is estimated that, owing to carelessness and inefficiency, there is wasted in garbage every year food to the value \$56,000,000 or about \$7.60 per total population. By complete organization and rigid economy it is thought the cost of living can be reduced by five cents per day for each individual.

Counting in the elimination of garbage waste this would mean an annual saving of \$25.55 per head, or a national grand total saving of \$204,400,000 enough to feed an army of one million men a year.

**A Success—Twice Over**

This season's thirty-five horsepower Overland Model Eighty-Five has scored a double hit in Canada.

For this is the popular model that offers to buyers a choice of either a Four or a Six. It is built in both motor designs.

The wheelbase of the Four is 112 inches—the Six 116 inches.

Solid comfort is assured in both. Big, roomy seats and cantilever rear springs are just two of the reasons why.

As for the motors themselves, little need be said—the fame of the Overland thirty-five horsepower four-cylinder engine is known the world over. And the engine in the six is just as efficient.

We believe the Overland Eighty-Five comes closer to fulfilling the commonsense requirements of more people in Canada than any other model brought out this year.

Let us show you these cars.
