Where Do They Go?
What do they do, the ones who leave us lonely,
What do they hear when all life ends so low,
That with a smile as if by angels bidden,
They face our clay, and seem so glad to go?
What do they see that to our eyes is hidden,
What do they hear that beckons them afar—
Is it some voice unheard by us, or only
Inspiration comes from some lonely star?
Where do they go, the ones who leave us lonely,
Is it so far, the land we do not know,
No pure the joys to which their souls are bidden,
No green the fields through which their bodies flow?
What do they see that to our eyes is hidden,
That, having left behind the earthy bar,
They see the faces of those who do not only
The lights of home that signal their afar?
Co-operative Egg Circles.
An important part of the poultry work of the Live Stock Branch of the Department of Agriculture, during the past year has been the organization of co-operative egg circles. Ten circles in all have been organized under the auspices of the branch, working in conjunction with the provincial and agricultural college authorities and the Poultry Producers' Association of Canada. The preliminary work in connection with a number of others has been done, and from present indications it is apparent that this phase of co-operative work is likely to have a rapid growth in the near future.
Being primarily concerned with the improvement of the Canadian egg trade the Live Stock Branch has encouraged the formation of these circles because the movement affords a means whereby the quality of eggs can be improved as they leave the farm, and the pernicious practice of holding eggs both on the farm and in the country store largely eliminated. Co-operative efforts of this kind also afford a medium whereby the eggs in any given community may be collected and marketed frequently and regularly, and insures to the consumer a new-laid egg of uniform quality at no great increase in cost.
At the time of joining the association the members agree to stamp each egg with a given number designated by the Board of Directors. This is done so that the eggs of each member may be identified when graded and payment made according to quality.
A manager is appointed by the Board of Directors whose business it is to collect, grade, sell the eggs and apportion the returns among the members according to the quantity marketed according to the quality received. In most circles the eggs from each farm are collected at stated intervals, but in others the members deliver the eggs to some central point such as a creamery, cheese factory, store or house, from which the manager makes the shipment. It is well known that at certain

seasons of the year there is a wide difference between the price received for eggs by the farmer in the country store and the price paid by the consumer in the city. The difference is not nearly so marked in the spring of the year as it is in the late summer, fall and winter. In other words, as the quality of ordinary farm eggs becomes more uncertain the premium placed on new laid circle eggs increases. While during the spring of the year, prices received by circle members may not greatly exceed those paid in the local stores, it is a fact that for the eggs produced in the month of December last year the majority of circles in the provinces of Ontario and Quebec received a price of from 45 to 50 cents a dozen.
A limited number of circles will no doubt be able to take advantage of the rapidly growing select trade in the larger Canadian cities, but from the fact that the wholesale egg dealers in Ontario and Quebec have recently adopted a new system of buying on a basis of quality, it is likely that the product of the majority of circles will find its way to the consumer through the more recently established channels of trade.
The Live Stock Branch stands ready and willing to help on the egg circle movement in every possible way. Officers of this branch are now in the field, and there is available a quantity of literature, including outlines of constitutions, by-laws, etc., dealing with the work, copies of which may be obtained upon request from the Live Stock Commissioner, Ottawa.

The Habit of Laughter.
"It is pleasant," said Mr. Burke once, a grave and anxious gentleman. "But was the grave and anxious gentleman persuaded? So eminent a man of Justice Story believed that to be healthy it was wise to laugh an hour every day."
Laughter is pre-eminently a social habit. We mask our cares with laughter—when we can. We convey our sympathy to others by laughter, or at least by kindly smiles. What is more charming—in a street-car, for example—than to see a tense face, a frown, a scowl, a face suddenly brighten with recognition of a look it loves? Idiots laugh alone. We all feel a little idiotic when we do it, although it is not certain that we are so. On the other hand, very solemn persons will grow quite boisterous in a merry company.
It is amazing how easily laughter can be cultivated. Everything in our ordinary lives has its lighter side, its gay side, even things to which a grave turn of mind would never suspect it. What pleasterer habit than of detecting sunshine, of pointing it out to others?
Laughter has its dangers, of course. "Tell me what you laugh at, and I will tell you what you are," said Goethe. And again, "Some people find almost everything laughable, some almost nothing." There is a happy mean here as elsewhere. Sometimes laughter is foolish, sometimes it is cruel. Great thoughts of men and women have been known to laugh at the conditions of physical suffering in animals, even in humanity. Such laughter is ghastly to think of, but a hideousness beyond the expression of hate. But the nineteenth century, which taught us some bad things and some good ones, taught above everything else a depth of pity that makes such cruel laughter almost impossible.
There is one safe subject of laughter—yourself. The ancients had a fine phrase about seeing things under the aspect of eternity. When you find yourself swamped, drowned in little cares and vexations, think how short they are, how long life is, how long beauty lasts, and love, and nature, and God. The contrast will make you smile a little, and that smile will get the habit of it, in one of the best antidotes for misery ever yet discovered by man.
Cure for Stomach Disorders.
Disorders of the stomach may be avoided by the use of Chamberlain's Tablets. Many very remarkable cures have been effected by these tablets. Sold by all dealers.
Sail Without Chronometer.
The French sea captains who bring their vessels across the Atlantic every spring to fish on the Newfoundland Banks navigate almost exactly as they did in the days of Columbus, says the New York World.
Of the 250 French sailing vessels on the Banks last year 240 were fitted out in Normandy and Brittany, their captains found their way across the trackless wastes of the ocean without difficulty.
They take observations for latitude, but they have no chronometers, and are unable to tell their longitude except by guesswork. On the westward voyage they can tell by soundings where they arrive on the Banks.
On the return voyage in the fall they roughly estimate their position when they cross the lanes of the trans Atlantic liners converging towards the English Channel.
In spite of this primitive navigation these skippers reach port in safety year after year. There are about 7000 men engaged in the fishery. They leave France in March and the voyage takes from 12 to 15 days, according to the weather.
They return in the fall, and their total profits for the seven months average not more than \$150.
A young sport with loud hose and a cigarette dropped into a restaurant and ordered a veal cutlet. When it arrived he yelled:
"Do you call that a veal cutlet? Why that's an insult to a calf to call that a veal cutlet."
"I didn't mean to insult you, sir," said the waiter.
Well, after a lot of experience in speculating I have at last learned how to keep on the right side of the stock market.
Would you mind posting me, old chap?
Not at all. The right side of the stock market, my dear fellow, is the outside.
Willie—Faw, what is the difference between a political job and any other job?
Faw—You have to work hard to get a political job, my son, and you have to work hard to hold the other kind.
Many a man fails to forge ahead because he has the looking backward habit.

The Poultry Industry of Canada.
During the past session of the Dominion Parliament, Mr. A. G. Gilbert, poultry manager at the Central Experimental Farm, gave evidence before the Select Standing Committee on Agriculture and Colonization on the development of the poultry industry. This evidence, which includes an address followed by questions put to Mr. Gilbert, and answered by him, has been printed in pamphlet form for public distribution. The subject is dealt with under the following heads: the value of the poultry industry, how the industry is tending, the attitude of the farmer towards it, and the form of development best calculated to help the farmer.
It is clearly shown that the demand for eggs in Canada has increased much more rapidly than the supply during recent years. In 1902 we exported to Great Britain, eggs to the value of \$1,733,242; nine years later the exports had fallen to less than a value of twenty-five thousand dollars while the imports in 1912 reached a value approaching half a million dollars.
It is pointed out that farmers are not taking full advantage of the high prices offered for strictly new laid eggs at all seasons of the year. The good profits from these are being secured chiefly by specialists who are often at the disadvantage of having to pay retail prices for feed. Much useful information is contained in this pamphlet which may be procured from the Publications Branch, Department of Agriculture, Ottawa.

JOHNSON'S ANODYNE LINIMENT
Used 102 Years for Internal and External Ills.
Gives speedy relief from coughs, colds, cramps, diarrhoea, muscular rheumatism, bruises, etc.
25c and 50c everywhere
I. S. JOHNSON & CO.
Boston, Mass.

For the Sake of the Children.
Advocates of more open spaces in the cities, of better surroundings for the people who are crowded to live in congested districts, will find an answerable argument for their cause in the report just made by the Kansas City board of public welfare. The report is featured by a map showing what parts of the city contribute most largely to the cases in the juvenile and delinquency courts. The dots designating the places of origin of such cases are bunched thickly in the districts where the houses are closest together, and where the children have to go to the streets to play.
"The offence of the juvenile delinquent," says Judge Porterfield of the juvenile court of Kansas City, "is the natural outcome of the wretched surroundings in which he has to live. Give a child a suitable home and a reasonable parental affection, care, control and training, and he will in the great majority of cases, become a good citizen."
And the judge's theory is amply substantiated by the map of the city welfare board.

Clean Up Your Yard.
Clean up, ought to be the keynote of this month. All dirt and especially stable cleanings are the prolific breeding grounds of the pestiferous house fly, the most efficient vehicle of disease known to modern science.
To successfully war on the house fly the people must advance in a solid phalanx against it. It will not avail merely if one man cleans up his premises and his next door neighbor leaves his garbage and rotten boxes and barrels lying about or his stable debris in the backyard. All must clean up at the same time and see to it that the premises stay clean.
If your neighbor does not clean up the local Board of Health will attend to his case if you take the trouble to telephone a complaint.
Let him be used freely on all stables and filthy places.

Arrow Points.
Forgive and be forgiven.
Let doves go with doves, and doves with doves.
Few are as good as they would like others to think they are.
Height or want of height is of little moment. The Apostle Paul was said to be 'low and of little stature.' Chrysostom described him as 'a man three cubits high, (above five feet), yet tall enough to reach heaven.' It takes thought, faith and grace in the soul to do that.
Lord Jesus, grant to me the grace Thy footsteps day by day to trace. Until I see Thee face to face.
PASTOR J. CLARK.

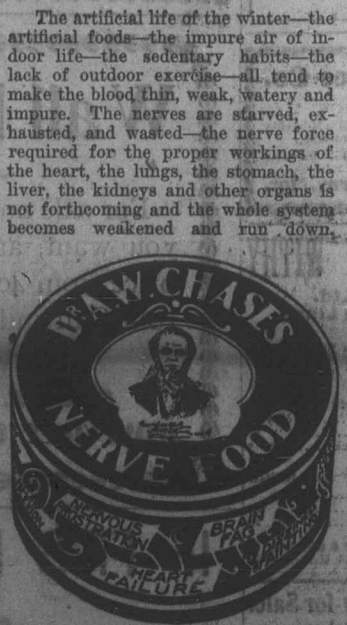

Flash Lights.
Facts at any price always looks good to the man who couldn't buy it at any price.
A failure is a man who has quit trying to find something he can do. A dud may marry a girl with money, but he is still a dud.
A man is also known by the company he keeps out of.
The more a man knows the less he is apt to tell.
Clara—Rose told me that you told her that secret I told you not to tell her.
Belle—She's a mean thing! I told her not to tell you.
Clara—Well, I told her I wouldn't tell you she told me, so don't tell her I did.
Woman Suffrage Advocate (to politician)—I maintain that woman has always been the prime factor in this world.
Politician (blandly)—Oh, I don't know. In the very beginning woman was only a side issue.
Mr. Hogan—Where did Ol' git 'th' black eye? Ol' n' just after bein' initiated.
Mr. Kelly—Into what society?
Mr. Hogan—Into 'th' society av me mether-in-law.
Keep a box of wooden toothpicks handy to take cakes when baking. It will save running for a broom straw, to say nothing of being far more sanitary and appetizing.

A Good Medicine for the Spring.
DO NOT USE HARSH PURGATIVES—A TONIC IS ALL YOU NEED.
Not exactly sick—but not feeling quite well. That is the way most people feel in the spring. Easily tired, appetite fickle, sometimes headaches, and a feeling of depression. Pimples or eruptions may appear on the skin, or there may be twinges of rheumatism or neuralgia. Any of these indicate that the blood is out of order—that the indoor life of winter has left its mark upon you and may easily develop into more serious trouble.
Do not dose yourself with purgatives, as so many people do, in the hope that you can put your blood right. Purgatives gallop through the system and weaken instead of giving strength. Any doctor will tell you this is true. What you need in spring is a tonic that will make new blood and build up the nerves. Dr. Williams' Pink Pills is the only medicine that can do this speedily, safely and surely. Every dose of this medicine makes new blood which clears the skin, strengthens the appetite and makes tired, depressed men, women and children bright, active and strong. Mrs. Maude Bagg, Lemberg, Sask., says: "I can unhesitatingly recommend Dr. Williams' Pink Pills as a blood builder and tonic. I was very much run down when I began using the Pills, and a few boxes fully restored my health."
Sold by all medicine dealers or by mail at 50 cents a box or six boxes for \$2.50 from the Dr. Williams' Medicine Co., Brockville, Ont.

The Canadian Pacific railway will spend fourteen million dollars on a tunnel through Kicking Horse Pass of the Rocky Mountains so it was announced positively recently. The tunnel will take seven years in building, being sixteen miles long, four miles longer than the Simpson tunnel, though the Alps.

ROYAL Baking Powder Absolutely Pure
Royal Baking Powder is indispensable to finest cookery and to the comfort and convenience of modern housekeeping. Royal Baking Powder makes hot breads, cakes and pastry wholesome. Perfectly leavens without fermentation.
Full instructions in the "Royal Baker and Pastry Cook" book for making all kinds of bread, biscuit and cake with Royal Baking Powder. Grants to any address.
ROYAL BAKING POWDER CO., NEW YORK

Why is the Blood Impure in the Spring?

The artificial life of the winter—the artificial foods—the impure air of indoor life—the sedentary habits—the lack of outdoor exercise—all tend to make the blood thin, weak, watery and impure. The nerves are starved, exhausted, and wasted—the nerve force required for the proper workings of the heart, the lungs, the stomach, the liver, the kidneys and other organs is not forthcoming and the whole system becomes weakened and run down.

When spring comes vitality is at low ebb, and nine persons out of ten require restorative treatment to form new, rich blood and revitalize the nervous system.
Disease lurks on every hand in the spring time, and finds lodgment in the weak, run-down, and exhausted system.

Dr. Chase's Nerve Food

The great nerve restorative, 50c a box, 6 for \$2.50, all dealers, or Edmonson, Bates & Co., Limited, Toronto.

—you can protect yourself by using Dr. Chase's Nerve Food.
The spring air is often laden with disease germs. The waste and decayed matter of winter is thawed out, and forms a regular hotbed of disease, from which arise poisonous gases and germs of disease.
People with rich blood throbbing through their arteries need have little fear, for disease seeks out the weak and exhausted for its easy victims. For such there is no season more to be dreaded than spring.
Is this spring to be pleasant or disagreeable to you? Are you to feel invigorated by the fresh spring air; or rejoice in the opening bud, the sprouting blade, and chirping of the birds? Or will you be overcome with languor and weakness, suffer from headaches and body pains, and drag yourself languidly about as though you had no interest in life and had lost all vigor and energy?
It is for you to decide this question, for the difference is in the state of your health, the richness and purity of your blood, and the vitality of your nervous system. After the debilitating influence of the artificial winter life, nine persons out of ten require some restorative preparation to put their system in order for the enjoyment of life.
As a means of enriching and purifying the blood, building up the system, and revitalizing the wasted nerves, there is yet to be discovered a preparation in any way equal to Dr. Chase's Nerve Food.
This great food cure is composed of the most powerful restoratives to be found in all Nature's realm. It actually forms new, red corpuscles in the blood, feeds and builds up the shrivelled nerve cells, and gives new vigor and activity to every organ of the body.

TOWN OF WOLFVILLE.
J. F. CHAMBERS, Mayor.
A. F. COLWELL, Town Clerk.
OFFICE HOURS:
9:00 to 12:30 a. m.
1:30 to 5:30 p. m.
