In months ago I was completely covered with a terrible humor and serofulous sores. The humor caused an incessant, and intolerable itching, and the skin cracked so as to cause the blood to flow in many places whenever I moved. My sufferings were great, and my life a burden. I commenced the use of the Sarsaparkilla in April last, and have used it regularly since that time. My condition began to improve at once. The sores have all healed, and I feel perfectly well in every "sypect—being now able to do a good day" work, although 73 years of age. Many inquire what has wrought such a cure in my case, and I tell them, as I have here tried to bell you, AYER'S SARSAPARILLA. Glover, Vt., Oct. 21, 1882.

Leo XIII. to Cardinal Jacobini, Secretary of State, concerning the measures to be adopted if the choleral should invade Rome, is the subject of discussion in the Liberal journals and amongst the people. This letter which, though dated the 10th of September, was only made known to the public on the night of the 20th, is a noble testimony to the devotion of the Soverieja Pontifican and of his care for the people of his beloved city of Rome. The Holy, Father begins by noting that the terrible plague of Asiatic choleral which first appeared in the neighboring nation of France, has attacked likewise many parts of Northern and Southern Italy, spreading destruction and ruin. Providence has, so far, sheltered by a special protection the city of Rome, in preserving it from this plague. For which mercy, his Holines, with the deepest and most devoted gratefulness has offered, and continues still to offer the most humble thanksgiving to the Divine Goodness and with the whole fervor of his soul he daily lifts up his supplicating hands and voice to the Father of Mercies, that He may, by the powerful intercession of the Boston of the Boston of the Mercies, the work the chollength stream of Southern Italy.
