From the Heart of the Wheat

Comes the delicate flour.

There's only a little.

And around it lies gluten that's hard and tough-bothersome in baking.

To pick this cream of the flour from the ordinary, we sift it ten times-

Ten times through fine silk.

And only the daintiest particles, sifting through, go out as Gold Medal Flour.

The rest we deem unfit.

Do you want all of the flour, or just the best of the flour?

Will you have milk and cream, or just the cream, when both cost an equal price?

There can't be any question.

Then in ordering, Madam, don't merely say "flour." That means any flour.

Say the flour you want—say—

Washburn-Crosby's

LAON EXPLAINED. 2.—Reinforced by Brittoops, the French eral lines of trenches along the hill-THE MODERN MERCURY

Mercury, the winged messenger of the gods (according to ancient legends) had small wings on his feet to speed over the land with the ease of a bird. But Mercury had no advantage over the modern skater who uses Canadian-made "STARR" Skates.

"STARR" Skates take the place of wings—they are light, strong, comfortable—and enable the wearer to skim lightly and confidently over the ice—whether in pure fun or the swift sport of a hockey game.

The popular "STARR Mic-Mac Featherweight" Hockey Skate (trademark registered at Ottawa) shown at the bottom of this advertisement is a speedy hockey skate, and equally good for rink skating.

It is especially strong, because of the bar connecting the heel and sole plates. The specially welded and tempered steel blades retain their cutting surface longer and better. Very little sharpening is needed.

Hitch yourself to a "STARR" Skate and surprise vourself and your friends.

riends.
"STARR" Skates are equally good for artificial or natural ice. We absolutely guarantee "STARR" Skates unconditionally—if they break, take them back and get a new pair.
