WIRELESS TELEPHONY AN ASSURED SUCCESS

Waldemar Pouleen Says His Experiments Demonstrate Practicability

London, Dec. 28.—A special despatch from Berlin confirms the Copenhagen telegram to the New York Times recording the success of Walachievement. Messages were twice exchanged between Lyngby, near Co penhagen, and Weissensee, a suburb of Berlin, a distance of 250 miles. The ransmission left nothing to be desired in the way of clearness and au-The recorder and transmiter were tuned alike, and, punctually at the signal, the first long-distance wireless telephonic message was flashed through the air from Berlin across North Germany and the waters of the sound. What makes it so important that we had satisfactory results is that while the current was very weak, yet we obtained a clearness equal to the ordinary wire telephone. We transmitted verbal messages, and also had excellent gramophone reproductions. We will still further improve the lent gramophone reproductions. We will still further improve the sounding of the apparatus."

Poulsen admitted that he had expected this success of his experiments.

DEEP SEA ANIMALS entists Ask Congress to Pass Laws Protecting Whales and Green

New Haven, Conn., Dec. 28.-Con-

gress is to be asked to establish game laws for the protection of whales and America, at Yale university, a resolu tion was passed asking congress to prevent the slaughter of these deep sea animals during the breeding sea-son. Prof. G. R. Wieland, of Yale scientific school, who has been studying the subject for ten years, stated in an address that 1,000,000 whales had been killed in the last 100 years and that the financial profit from this killing had amounted to \$272,000,000.

He said that the whale is almost gone, and unless he is to disappear altogether some means must be found to Prof. Wieland also pointed out that the green turtle is rapidly disappearing and is doomed to complete destruction unless preserved.
