Turned Out En Masse to
Enjoy It.

Toronto was out of town Saturday. About 1
p.m. a stream of humanity began to flow down
Yonge-street towards the docks. And it increased
in volume and swiftness as boat time arrived. At
the foot of Yonge-street the stream diverged to
the different wharves, and some minutes before
2 o'clock every boat was crowded. The
Garden City had to stop selling tickets
some time before the boat was billed to
leave the dock. As much of Toronto as possible

Eddy's Pulleys.

Editor World: We notice in issue of this day that you publish a notice of some new machinery for Eddy and state that he is introducing a system of large wire rope pulleys. This is emphatically wrong. The facts are the Dodge Wood Split Pulley Company of Toronto are supplying the E. B. Eddy Company with three 500 horse-power manilia rope transmissions under their patents and under their personal superintendence. The pulleys beinguised are certainty sery large and heavy castings and have been finished in a first-class manner. To this announcement we take no exception, but would like to have you say the facts as regards the system used. Furthermore, a system of wire ropes for this case would be impracticable. Your insertion of this would oblige Dodge Wood Split Pulley Company.
