Kennan on Siberia.

Except the Life of Lincoln and the War Articles, no more important series has ever been undertaken by The Century than this of Mr. Kennan's. With the previous preparation of four years' travel and study in Russia and Siberia, the author undertook a journey of 15,000 miles for the special investigation here required. An introduction from the Russian Minister of the Interior admitted him to the principal mines and prisons, where he became acquainted with come three hundred State exiles,—Liberals, Nihilists, and others,—and the series will be a startling as well as accurate relations of the exile system. The many illustrations by the artist and photographer, Mr. George A. Frost who accompanied the author, will add greatly to the value of the articles.
