

4. Fam. *Engidae*, MacLeay.1. *Ips*, *Herbst*.

*I. fasciatus*, *Oliv.* Not very common.

*I. quadrisignatus*, *Say*. Extremely abundant in decaying vegetable matter, and flying in May.

5. Fam. *Cucujidae*, Westw.

(See Proc. Acad. Nat. Sci. Phila., Vol. VII. p. 73.)

1. *Laemophlaeus*, *Dej.*

*L. fasciatus*, *Mels.* By sweeping grass on Logan's farm, August.

2. *Silvanus*, *Latr.*

*S. Surinamensis*, *Linn.* Rare in houses.

6. Fam. *Cryptophagidae*, Schaum.1. *Cryptophagus*, *Herbst*.

*C. (not determined.)* Under a dead rat in a cellar, Little St. James Street.

2. *Atomaria*, *Kirby*.

*A. (not determined.)* Abundant by sweeping herbage on the Mountain, June.

7. Fam. *Lathridiidae*.

(See Proc. Acad. Nat. Sci. Phila., Vol. VII. p. 299.)

1. *Corticaria*, *Marsham*.

*C. Americana*, *Mann.* By sweeping grass, June.

2. *Lathridius*, *Illig.*

*L. reflexus*, *Lec.* By sweeping grass, Logan's farm, October.

8. Fam. *Dermestidae*, Leach.

(See Proc. Acad. Nat. Sci. Phila., Vol. VII. p. 106.)

1. *Byturus*, *Latr.*

*B. unicolor*, *Say.* By sweeping herbage on the Mountain, June.

2. *Dermestes*, *Linn.*

*D. lardarius*, *Linn.* Abundant in houses; very destructive to preserved specimens of natural history: also under bark of trees in autumn.

3. *Attagenus*, *Latr.*

*A. megatoma*, *Fabr.* Abundant in houses, and very destructive to preserved specimens of natural history.

9. Fam. *Byrrhidae*, Leach.

(See Proc. Acad. Nat. Sci. Phila., Vol. VII. p. 113.)

1. *Byrrhus*, *Linn.*

*B. picipes*, *Kirby.* Common.

*B. Americanus*, *Lec.* Rare.

2. *Cytillus*, *Erich.*

*C. varius*, *Fabr.* Rare, May.

## LAMELLICORNES.

1. Fam. *Lucanidae*, Leach.1. *Platycerus*, *MacLeay.*

*P. depressus*, *Lec.* Under bark of stumps on the Mountain.
